

University Math Challenge

April 9, 2024 to April 26, 2024

PROBLEM # 2

April Fools!

(1) Below is an arrangement of four matches in a cross. Move **one** (and no more than one) match to make a square. Explain your answer.

(2) A fridge door has only the magnets 1, 2, 2, 3, 3, 3, + and =. Using **all** of these magnets, create a correct mathematical equality on the fridge.

*Direct any questions to
Grant Lakeland (OM 3226)*

Rules & Rewards

- Any undergraduate currently enrolled at EIU is eligible to participate.
- Each solution is to be the work of one individual and is to be submitted with the solver's name, year in school, email address, local address, and home address.
- Each solution is to be written or typed and is due in the main Mathematics Department office (OM 3611) by 2:00pm, Friday, April 26, 2024.
- Entries will be judged on the basis of clarity of exposition and elegance of the solution. That is to say, the *explanation* is more important than the answer.
- An award of \$50 will be given for the best solution. In the case of a two-way tie, the award will be evenly split. If there are more than two 'best' solutions, a drawing will be held for the reward. In the case no award is made for this week's challenge, \$50 will be added to the next week's award.
- Names of all solvers will be posted on the Challenge of the Month bulletin board and on the Challenge homepage: <http://www.eiu.edu/math/challenge.php>
