## Department of Mathematics and Computer Science Mathematics Placement Guidelines - effective September 2021

The Department of Mathematics and Computer Science offers three avenues for math placement -

- Placement by Math ACT/SAT scores
- Placement by Accuplacer Math Placement Test
- Placement by high school GPA and high school courses taken

Note that students who have high school transcripts with grades of Pass/Fail, Credit/No Credit, or other such binary grading schemes for mathematics classes will be unable to use high school GPA and high school mathematics completed option for mathematics placement.

These placement options are generally used if the student does not have transfer courses, dual credit courses, or AP test scores.

Each of the placement options are detailed on the pages that follow

## Department of Mathematics and Computer Science Mathematics Placement Guidelines - effective September 2021

## Placement by ACT or SAT scores

- Students wanting to enroll in MAT 1271, MAT 2250G or any course with MAT 1271 as a prerequisite

| Math ACT | Math SAT | Action |
| :--- | :--- | :--- |
| 26 and <br> above | 610 and above | exempt from MAT 1271 |
| $20-25$ | $520-600$ | enroll in MAT 1271 or MAT 2250G |
| $17-19$ | $440-510$ | enroll in MAT 1270 (w/o MAT 1070) |
| 16 and <br> below | 430 and below | enroll in MAT 1070 (will be simultaneously enrolled in <br> MAT 1270) |

Note: Students who must enroll in MAT 1270 will need a C or better in the course in order to advance to MAT 1271

- Students wanting to enroll in MAT 1441G

| Math ACT | Math SAT | Action |
| :--- | :--- | :--- |
| 27 and <br> above | 630 and above | enroll in MAT 1441G |
| $22-26$ | $550-620$ | take Placement test (see guidelines below) |
| 21 and <br> below | 540 and below | MAT 1271 and MAT 1410 required. <br> Placement in MAT 1070/1270/1271 governed by MAT <br> 1271 placement guidelines above. |

- Teaching licensure majors wanting to enroll in MAT 1420

| Math ACT | Math SAT | Action |
| :--- | :--- | :--- |
| 17 and <br> above | 440 and above | enroll in MAT 1420 |
| 16 and <br> below | 430 and below | enroll in MAT 1020 and MAT 1420 concurrently |

${ }^{1}$ Students enroll in MAT 1070 only. They will be enrolled in the correct section of MAT 1270 by the department in the week before classes begin. Students who take MAT 1070 should not enroll in MAT 1270 by themselves but they can be assured it will be added to their schedule in a section which meets at a time already blocked off for them by virtue of enrolling in MAT 1070.

## Department of Mathematics and Computer Science Mathematics Placement Guidelines - effective September 2021

## Placement by the Placement Test

- All placement tests must be authorized by an academic advisor or Chair of the Department of Mathematics and Computer Science. Once authorized, the student must coordinate the day and time of the test with Office of Testing and Evaluation Services (217-581-5986).
- Students may take the placement test one time at no cost.
- If a student seeks and is granted authorization to take the placement test a second time, there will be a charge of $\$ 20$ to the student payable at the time of testing.
- Should a student seek to take the placement test a third time, he or she must first consult with the Chair of the Department of Mathematics and Computer Science. A third placement test will also incur a cost of $\$ 20$ to the student payable at the time of testing.
- Placement test scores are valid for two academic years.
- Students wanting to enroll in MAT 1271, MAT 2250G or any course with MAT 1271 as a prerequisite

| Level 3 Test Score | Action |
| :--- | :--- |
| 256 and above | exempt from MAT 1271, enroll in courses with MAT 1271 as prerequisite |
| $240-255$ | enroll in MAT 1271 or MAT 2250G |

| Level 2 Test Score |  |
| :--- | :--- |
| 250 and above | enroll in MAT 1270 (w/o MAT 1070) |
| Below 250 | enroll in MAT 1070 (will be simultaneously enrolled in MAT 1270) ${ }^{1}$ |

Note: Students who must enroll in MAT 1270 will need a C or better in the course in order to advance to MAT 1271

- Students wanting to enroll in MAT 1441G will need a Level 2 test score of at least 251 to have access to the Level 3 test

| Level 3 Test Score | Action |
| :--- | :--- |
| 276 and above | enroll in MAT 1441G |
| 275 and below | enroll in MAT 1410 |

- Teaching licensure majors wanting to enroll in MAT 1420

| Level 1 Test Score | Action |
| :--- | :--- |
| 260 and above | enroll in MAT 1420 |
| Below 260 | enroll in MAT 1020 and MAT 1420 concurrently |

${ }^{1}$ Students enroll in MAT 1070 only. They will be enrolled in the correct section of MAT 1270 by the department in the week before classes begin. Students who take MAT 1070 should not enroll in MAT 1270 by themselves but they can be assured it will be added to their schedule in a section which meets at a time already blocked off for them by virtue of enrolling in MAT 1070.

## Department of Mathematics and Computer Science Mathematics Placement Guidelines - effective September 2021

## Placement by high school GPA and high school courses taken

Should a student want to use an unweighted cumulative high school GPA and math courses completed in high school, the student needs to ensure that an official and final high school transcript from an approved high school clearly showing math courses completed is on file with the university. If the high school GPA is weighed, information of how and what weights were applied must also be provided.
Students who have high school transcripts with mostly grades of Pass/Fail, Credit/No Credit, or other such binary grading schemes for mathematics classes will be unable to use high school GPA and high school mathematics completed option for mathematics placement.

The graduation date from the high school must be no later than five years from the date of enrollment in the requested math class at the university. The grade in a math course will generally be the semester grade, but individual term grades may be considered in special circumstances or if a semester grade is not issued.

The Chair of the Department of Mathematics and Computer Science will need to verify the unweighted high school GPA to be used, as well as mathematics courses taken. Student may be requested to verify that their Precalculus course included coverage of trigonometry.

## If the student has...

- an unweighted cumulative high school GPA lower than 2.2 on a 4.0 scale, student can enroll in

| MAT 1070 with MAT 1270 | or | MAT 1020 with MAT 1420 |
| :--- | :---: | :--- |

- an unweighted cumulative high school GPA greater than or equal to 2.2 , but less than 2.8 on a 4.0 scale or only two years of high school mathematics, student wan enroll in

| MAT 1270 | or | MAT 1020 with MAT 1420 |
| :--- | :--- | :--- |

- an unweighted cumulative high school GPA of 2.8 or higher on a 4.0 scale and at least three years of high school mathematics completed, each with a grade of ' C ' or better (not ' $\mathrm{C}-{ }^{-}$)
- student can enroll in

| any 1000 level mathematics course, except MAT 1441G | or | MAT 2250G |
| :--- | :--- | :--- |

- which includes a grade of ' B ' (not ' B ') or higher in an Algebra 2, Advanced Algebra, or Math Year 3 course

| any 1000 level mathematics course, except MAT 1441G | or | MAT 2250G, MAT 2120G |
| :--- | :--- | :--- |

- which includes a grade of ' $B$ ' (not ' $B-$ ') or better in a Precalculus course, student can enroll in | any 1000 level mathematics course, except MAT 1441G | or | MAT 2250G, MAT 2120G, MAT 2110G |
| :--- | :--- | :--- |
- which includes a grade of 'B' (not 'B-') or better in a Precalculus course that includes coverage of trigonometry or evidence of an additional course that covered trigonometry, student can enroll in | any 1000 level mathematics course | or | MAT 2250G, MAT 2120G, MAT 2110G |
| :--- | :---: | :--- |
- which includes a grade of ' $B$ ' or better in a Calculus course, student can enroll in | any 1000 level mathematics course | or | MAT 2250G, MAT 2120G, MAT 2110G |
| :--- | :---: | :--- |

${ }^{1}$ Students enroll in MAT 1070 only. They will be enrolled in the correct section of MAT 1270 by the department in the week before classes begin. Students who take MAT 1070 should not enroll in MAT 1270 by themselves but they can be assured it will be added to their schedule in a section which meets at a time already blocked off for them by virtue of enrolling in MAT 1070.
