Unit Theme: Educators as Creators of Effective Educational Environments: Integrating diverse students, subjects, strategies, societies and technologies.

Course Description: The instructional programs in reading from kindergarten through grade 6; goals, methods, and materials with emphasis on basal reader approaches. Field based activities will be provided in conjunction with ELE 3000.

Prerequisites: Concurrent enrollment in ELE 3000 and 3350; MLE 3110 and MLE 4000; or permission of department chair. University Teacher Education requirements apply and department requirements for enrollment must be met, including an expectation of second semester Junior standing.

Course Purpose: This course is designed to provide learning experiences for teacher candidates to prepare them to teach pupils from kindergarten through grade eight, the attitudes, skills, and concepts needed to become competent readers. The nature of reading as a developmental process, planning for instruction, emergent literacy, and development of competence in phonemic awareness, phonics, fluency, vocabulary, and comprehension strategies will be stressed. Because a developmental reading methods course is required for state certification, this course is required for elementary education majors in the General Elementary and Middle Level options.

Course Textbooks:

Elementary Level: Reutzel, D.R. & Cooter, R.B., Jr. (2008). *Teaching children to read: The teacher makes the difference* (5th Ed.).

Columbus, OH: Pearson Prentice Hall.

Middle Level: Gunning, T.G. (2012), *Creating literacy: Instruction for all students in grades 4-8* (3rd Ed.). New York: Allyn and Bacon.

Supplemental Materials:

LiveText - required for all Education Students at Eastern Illinois University

Teaching Model:

The Information-Processing Models

- Information-processing models emphasize ways of enhancing the human being's innate drive to make sense of the world by acquiring and organizing data, sensing problems and generating solutions to them, and developing concepts and language for conveying them.

The Social Family Models: Building the Learning Community

- When we work together, we generate a collective energy that we call synergy. The social models of teaching are constructed to take advantage of this phenomenon by building learning communities. Essentially, "classroom management" is a matter of developing cooperative relationships in the classroom. The development of positive school cultures is a process of developing integrative and productive ways of interacting and norms that support vigorous learning activity.

Joyce, B., Weil, M., & Calhoun, E. (2009). *Models of teaching*. (8th ed.). Boston: Pearson.

Dispositions: Teacher candidates in the Department of EC/ELE/MLE will exhibit professional ethical practices, effective communication, sensitivity to diversity, and the ability to provide varied teaching practices evidenced in a supportive and encouraging environment.

Live Text Assessment Requirement: For those classes with Live Text or Practicum- If the portfolio or Live Text requirements are rated, by the instructor, to have been completed in less than a satisfactory manner then no more than a "D" may be earned in the class regardless of the number of points earned.

Standards:

Course requirements and demonstrated competencies are aligned with the following standards:
