Students will be introduced to the EC/ELE/MLE program, with particular emphasis on the specific skill sets and dispositions necessary for success in the major.

Teaching Model:

The Social Family Models: Building the Learning Community

- When we work together, we generate a collective energy that we call synergy. The social models of teaching are constructed to take advantage of this phenomenon by building learning communities. Essentially, “classroom management” is a matter of developing cooperative relationships in the classroom. The development of positive school cultures is a process of developing integrative and productive ways of interacting and norms that support vigorous learning activity.

The Behavioral Models

- Behavioral models concentrate on observable behavior and clearly defined tasks and methods for communicating progress to the student.
