Unit Theme:

Educators as Creators of Effective Educational Environments: Integrating diverse students, subjects, strategies, societies and technologies.

Course Description:

This course emphasizes monitoring children's learning through data-driven assessment in order to meet the needs of diverse learners. Topics will include effective classroom management and developing positive teaching dispositions in order to become a reflective practitioner. This course includes class meeting times and supervised field experiences (minimum 60 hours).

Prerequisites:

Elementary General option: ELE 3100, 3280, 3340, 3350; or Early Childhood: ELE 3250, 3281, 4775

University Teacher Education requirements apply and department requirements for enrollment must be met.

Course Purpose:

This course emphasizes monitoring children's learning through data-driven assessment in order to meet the needs of diverse learners. Through implementation and reflection the teacher candidate will examine the effective cycle of teaching: planning, instruction and assessment that fosters a positive learning environment. This course includes class meeting times and supervised field experiences (minimum of 60 hours). A student must maintain a "C" average in all course work to be placed/continue in practicum.

Admission to student teaching depends upon successful completion of ELE 4100 and on the positive recommendation of the cooperating classroom teacher with whom the student participates for 60+ clinical hours.

Supplemental Materials:

Revised: May 2013

- Personal LiveText account
- Binder for course notebook
- Professional Development Requirements (PDR), sheet

Teaching Model:

The Information-Processing Models

- Information-processing models emphasize ways of enhancing the human being's innate drive to make sense of the world by acquiring and organizing data, sensing problems and generating solutions to them, and developing concepts and language for conveying them.

The Social Family Models: Building the Learning Community

- When we work together, we generate a collective energy that we call synergy. The social models of teaching are constructed to take advantage of this phenomenon by building learning communities. Essentially, "classroom management" is a matter of developing cooperative relationships in the classroom. The development of positive school cultures is a process of developing integrative and productive ways of interacting and norms that support vigorous learning activity.

Dispositions:

Teacher candidates in the Department of EC/ELE/MLE will exhibit professional ethical practices, effective communication, sensitivity to diversity, and the ability to provide varied teaching practices evidenced in a supportive and encouraging environment.

Live Text Assessment Requirement:

For those classes with Live Text or Practicum- If the portfolio or Live Text requirements are rated by the instructor to have been completed in less than a satisfactory manner then no more than a "D" may be earned in the class regardless of the number of points earned.

- Utilize a variety of approaches and classroom-based intervention strategies to analyze the needs of all learners and apply the Multi-Tiered System of Support Framework through differentiation, material selection and lesson pace.
- Apply and assess Common Core Standards in the design of lesson plans and units.
- Through observation and interpretation, teacher candidate implements a central focus using best practice techniques to provide an effective classroom environment to support the success of individual pupils.
- Analyze lesson plans and student work samples as a means to reflect on practice to improve instruction through data-driven decision making.
- Analyze and reflect on dispositions, both positive and negative in the teacher candidate's practicum assignment.
- Analyze the relationship between school, home and community so as to gain an understanding of the need for collaboration within the larger learning community.
