

## Department of Chemistry and Biochemistry Seminar Schedule Spring 2026

Date	Speaker	Title
2/23/2026	Austin Long	Carboxylesterase-Mediated hydrolysis of capectiabine and its role in activation
3/2/2026	Kat Setterlund	Hydrogen/Deuterium Exchange for chiral stability assessment in acidic methine-containing compounds
3/4/2026	Lauren Hendershot	Destruction of Chemical Warfare agents using MOF's and COF's
3/9/2026	Sam Eccles	Polyhydroxyalkanoates-nature's power to petroleum-based plastics.
3/11/2026	Anthony Aya	BODIPY dyes for photocatalytic C-N cross-coupling reactions
3/23/2026	Deep Patel	Glycin Rich Motifs as therapeutic target for Alzheimer's pathogenesis.
3/30/2026	Charlie Stauffer	Real-time characterization of chemical threat agent aerosols for improvement of inhalation studies.
4/6/2026	Morgan Drozs	Structure-Activity Profiling of Human Serine hydrolases using a fluorogenic ester library
4/13/2026	Adriana Arroyo-Plaza /Wyatt Kennedy	Active learning-Based Prediction of drug combination efficacy/ TBD

Graduate seminar
Senior Seminar
Junior Seminar
