

CONSULTATION VISIT

Illinois Higher Education Center

Purpose

The purpose of an IHEC consultation visit is for campuses to enhance or strengthen their current programming, provide data to justify need for future programming, and to ensure compliance with state and federal regulations.

IHEC staff members are available to guide colleges and universities in assessment, planning, and evaluation of campus AOD prevention efforts.

What to Expect

A series of brief meetings with key staff and administrators that are scheduled throughout the day, with a review of policies and programming. As a result of these interviews, we find the common emerging themes and analyze our data to create a comprehensive report that becomes the sole property of the institution.

Benefits

Better awareness and understanding of campus culture, effectiveness of current efforts, and we identify strategies to help you take the “next step.” This report has also been useful to inform your Biennial Review process, and enhance your campus relationships.

**“AMAZING, AWESOME,
PHENOMENAL!!!**

The report spoke to traditions that did not promote our university mission, nor the success of our students. The report gave very concrete ideas to how we could go about making changes and what other campuses were doing in the world of AOD prevention. The report did not ask us to change everything we were doing, just to tweak some key areas. This allowed all who read it to see that progressive and positive change was a real and attainable goal.”

-Counselor, Quincy University
