

A Message from the Research Committee

Special points of interest:

- 2009-2010 Conferences and deadlines.
- Research Grants in Kinesiology and Sport Studies

Research is the basis for much of the decision making in our lives. In Kinesiology and Sport Studies, research determines the content knowledge that we teach everyday. In a way, this research foundation is what makes our profession legitimate and worth studying, teaching, and learning. Professions that lack such a foundation will have a hard time explaining their existence.

Although EIU is not a research oriented institution, there are recent indicators that we are moving toward being more research oriented. With the

vision of the new president, academic units in our university are requested to encourage and increase undergraduate and graduate research production from their students as well as faculty.

Although a clear vision from the administration to promote research is needed, such vision is not enough to excite students and faculty to do research.

The purpose of the research committee is to promote research among students and faculty by sharing information, encouraging research groups,

Let's research!!!

and providing tools that can help.

Dr. Mavi, Pritschet, and Sipes
