

MBA 5640, Financial Management

Course Description: An investigation of the firm's acquisition and financial activities, to include working capital management, capital budgeting, capital structure strategies, and valuation theory. The practical application of financial policy is stressed for decision-making purposes. This is an interdisciplinary course and assumes a working knowledge of the principles in the preceding academic disciplines. *Prerequisites: BUS 3710, BUS 2810, and admission to the MBA Program.*

Learning Objectives:

1. Integrate treatment of the processes of financial management of the Firm into the existing business management fundamentals supported by the economic, finance, and accounting.
2. Develop an understanding of the unique characteristics of the financing process of the Firm.
3. Develop the fundamentals for using financial evaluation of the Firm to determine financial underwriting risk.
4. Attain the level of competence needed for you to understand political, physical and financial factors that contribute to the creation of Firm value.
5. Understand and apply the evaluative structure for integrating quantitative measures with qualitative characteristics to make a business decision.
