Majors and Minors

Undergraduate Degrees at Eastern Illinois University

Definition of Terms

Degree

A degree is the title which the University confers on a graduate as the result of his/her having completed university requirements for that degree. Eastern Illinois University confers the following degrees at the undergraduate level:

- Bachelor of Arts (BA)
- Bachelor of Fine Arts (BFA)
- Bachelor of Science (BS)
- Bachelor of Science in Business (BSB)
- Bachelor of Science in Education (BSEd)
- Bachelor of Music (BMus)

Major

A major is a field of study containing specific course requirements unique to a broad field of academic specialization. Requirements of all majors offered at EIU appear in this section.

Note: A student pursuing a degree other than a BS in Business cannot count more than 30 semester hours of business subjects toward fulfillment of bachelor's degree requirements.

Option

An option is a subset of a major academic field and provides a greater specificity within the broad area of knowledge of that major field of study. Examples of options offered at EIU are the teacher licensure options offered in many of the majors, and such specialized options as the Graphic Design Option in the Art major.

Minor

A minor is a part of a student's curriculum which allows that student to formally participate in a discipline or field of study outside his or her major. Most degree programs do not require a minor.

In order to declare a minor or minors:

- Students earning fewer than 60 hours should go to the Office of the Registrar and Enrollment Management
- Students earning 60 or more hours should contact their college certification officer when applying for graduation and ask him or her to add the minor(s).

For students in teacher licensure programs who wish to be endorsed in more than one teaching discipline, teacher licensure minors are available. These minors are NOT available to students enrolled in majors that are not teacher licensure programs. Completion of a teacher licensure minor does not guarantee that the individual will be granted an endorsement to teach in that field. Individuals must meet all requirements (including state tests) as set forth by the Illinois State Board of Education to be granted an endorsement in a second teaching field. Once the appropriate Dean indicates that the student has met the catalog requirements for the program, the teaching minor will be entered on the applicant's permanent record.

A student should plan a minor or teaching minor program in consultation with an appropriate advisor or Department Chairperson. If a student wishes to add a minor after having applied for graduation, he or she must contact their college certification officer and ask to add the minor.

Requirements for Minors

- Students should declare their minor as soon as possible.
- No courses in the minor can be taken credit/no credit unless they are courses which are designated as credit/no credit (such as internship).
- At least six (6) semester hours of the coursework in the minor must be completed in residence. These six (6) hours must also be taken for a grade in order to establish a grade point average for the minor. (The Accountancy Minor and the Finance Minor require nine (9) semester hours of coursework in the minor to be completed in residence).
- Minor GPA is computed from grades earned in minor courses taken at EIU only.
- Semester hours earned in independent study, research, internship, or study abroad may be used toward minor requirements at the discretion of and with the approval of the minor department(s).
- In order for the minor to appear on a student's permanent transcript, students must have a cumulative grade-point average of at least 2.00 in a non-teaching minor. Students with teaching minors who entered Fall 2002 and thereafter must earn a GPA of at least 2.65 in order for the minor to appear on their permanent transcript.

Pre-Degree and Non-Degree Programs

Pre-degree and non-degree programs are those which do not lead to graduation at EIU. The student and his/her advisor may make changes to such programs without the formality of application for a waiver.

Responsibility of the Student

The student has the ultimate responsibility to fulfill the requirements for a degree/program, to check his/her own eligibility to take courses, and to observe the academic rules governing his/her program. The advisor's role is to assist him/her in making important decisions.
