At the end of this intensive week of creative exploration your work will be exhibited in the Doudna Fine Arts Center (DFAC) Gallery 1910. The exhibition will include refreshments and a short ceremony. Parents and family are encouraged to attend.

Other extracurricular evening activities may include swimming, movie viewing, bowling, tie dying, an ice cream social, making new friends and just having an all around great time living on campus and experiencing college life.

Participants will be expected to commit themselves to a formidable course of study and development. We aim to stimulate and support your growth as an artist.

You'll be a part of a community focused on ideas, craftsmanship, and the exchange of artistic values. Courses are designed to help you build fundamental skills and develop your creativity.

A variety of recreational activities will also be planned and students will have time to relax, make new friends, and experience campus life.

Drawing Fundamentals

In this course, students will study the foundations of drawing while developing essential observational skills. Within the course of study the elements of art, principles of design, structure, perspective, visual measurement, composition and mark making will all contribute to a well-rounded learning experience. The learner while gaining new drawing techniques will investigate developing conceptual ideology.

Puppet Design & Fabrication

Students will learn how to design and build a puppet for stop motion animation using a variety of materials to fabricate the sculptural form. Through a series of demonstrations, reference clips, and assignments the students will learn to create a flexible humanoid puppet suitable for animated films. Due to time constraints, students will not be creating an animated film with their puppets in class. However, materials and computer applications needed to make an animated film at home will be discussed.

Watercolor Painting

This course explores the characteristics and use of water-based media. Students will create works that utilize the distinct characteristics of this particular media. Students will explore new processes in brushwork and color layering. Utilizing observation and imagination students will seek to find their own visual language viewing unforeseen occurrences as opportunities to discover new possibilities. This course is appropriate for students of varying degrees of experience but students should have some drawing experience.

Graphic Design

Students will be introduced to the art of graphic design. Within the fundamentals of problem solving, typography and composition will be explored. Tools and techniques for organizing information in ways that disseminates information in visually effective ways. Students will explore concept development to produce solutions based on meaningful ideas.
