

BACHELOR OF SCIENCE IN CONSTRUCTION MANAGEMENT

EVERYTHING HELPS GROW YOUR SUCCESS

The Construction Management program will prepare you to meet the challenges of becoming competent superintendents and project managers in the residential, commercial, and industrial arenas.

This well-rounded degree can prepare you for jobs such as:

- Construction Business Development
- Constructing
- Construction Supervision
- Cost Estimating
- Field Engineering
- Project Management
- Project Engineering
- Project Scheduling
- Quality Assurance Management
- Safety Management
- Virtual Project Designing
- And many more...

TECHNOLOGY-DRIVEN CURRICULUM

Your coursework will incorporate the latest available software applications, animations, simulations, building information modeling, and virtual reality methods. With these tools, you can learn to effectively plan projects, communicate to stakeholders, and analyze project performance.

- + **STRONG JOB OUTLOOK**
- + **DEDICATED AND HIGH QUALITY FACULTY**
- + **HANDS-ON PRACTICAL LEARNING**

VALUE-ADDED LEARNING

You will learn to maximize the value of a design by understanding life-cycle costing techniques, sensor networks, and intelligent building design.

BUSINESS EMPHASIS

Principles of accounting, finance, risk minimization, and employee protection are emphasized so that you will develop the best overall construction techniques for the project.

EXPERTISE

You will learn from instructors experienced in the construction field, lending practicality to your training. Small class sizes ensures your instructors will get to know you personally. Through a combination of interactive lectures, graphic exercises, demonstration classes, and field exercises, you will build valuable working knowledge, enabling you to communicate with engineering subject experts as you develop your craft.
