

Instructions for Accessing Argos

After you have received notification of your signon in Argos:

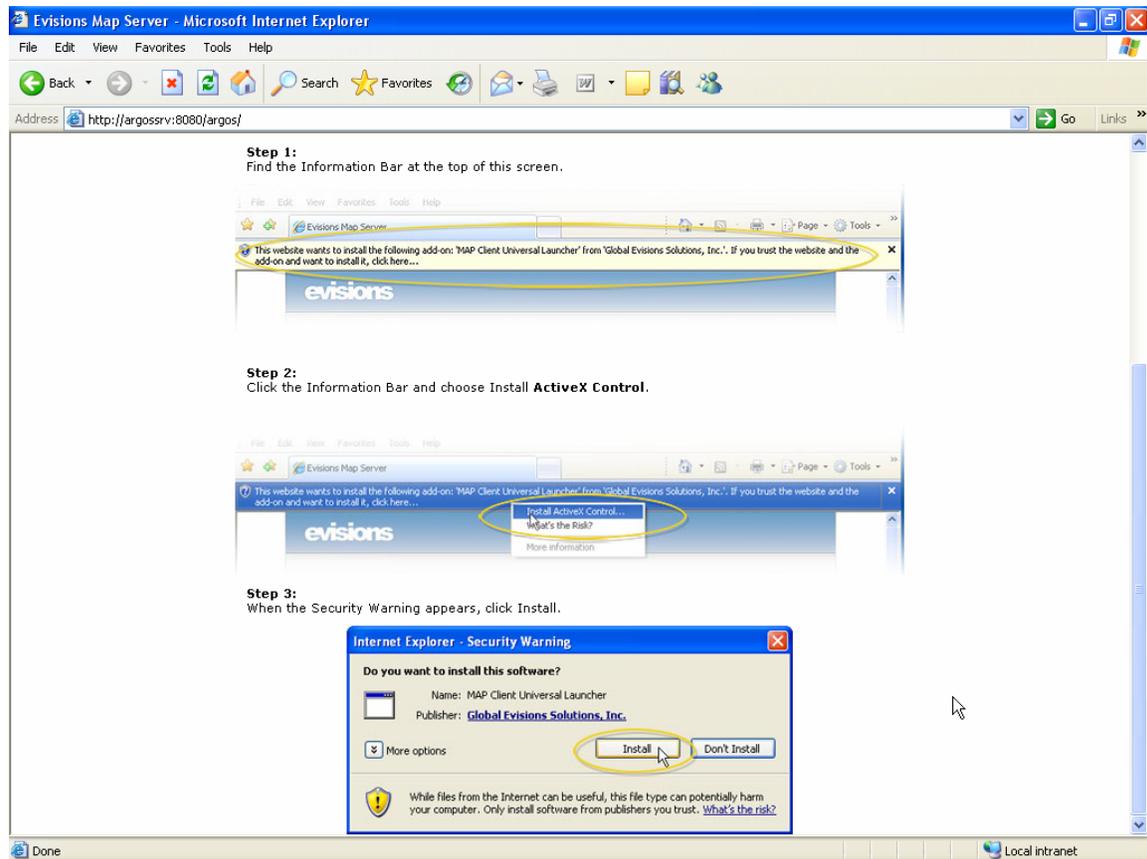

Recommend reading the Argos Getting Started Guide v2 from Evisions website (www.evisions.com – select Argos, then select Resources)

To open an Argos session:

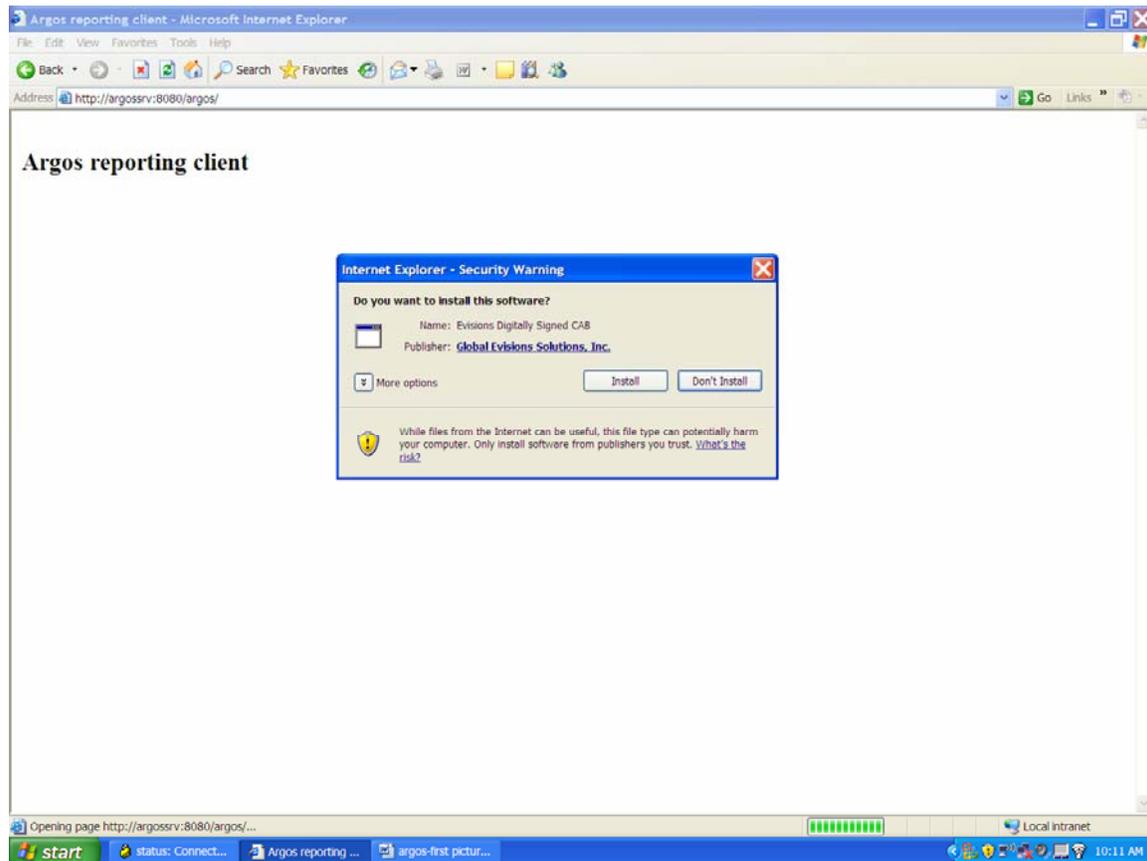

Open Internet Explorer

For the url, enter: <http://argosrv:8080/argos/> (you may want to add it to your favorites)

You should receive the following screen:

The next screen to appear will ask if you want to install the Argos Reporting Client. See below:

Please click on Install.

After successful installation, you will be presented with a login prompt:

The screenshot shows a "Login" dialog box with the following fields and options:

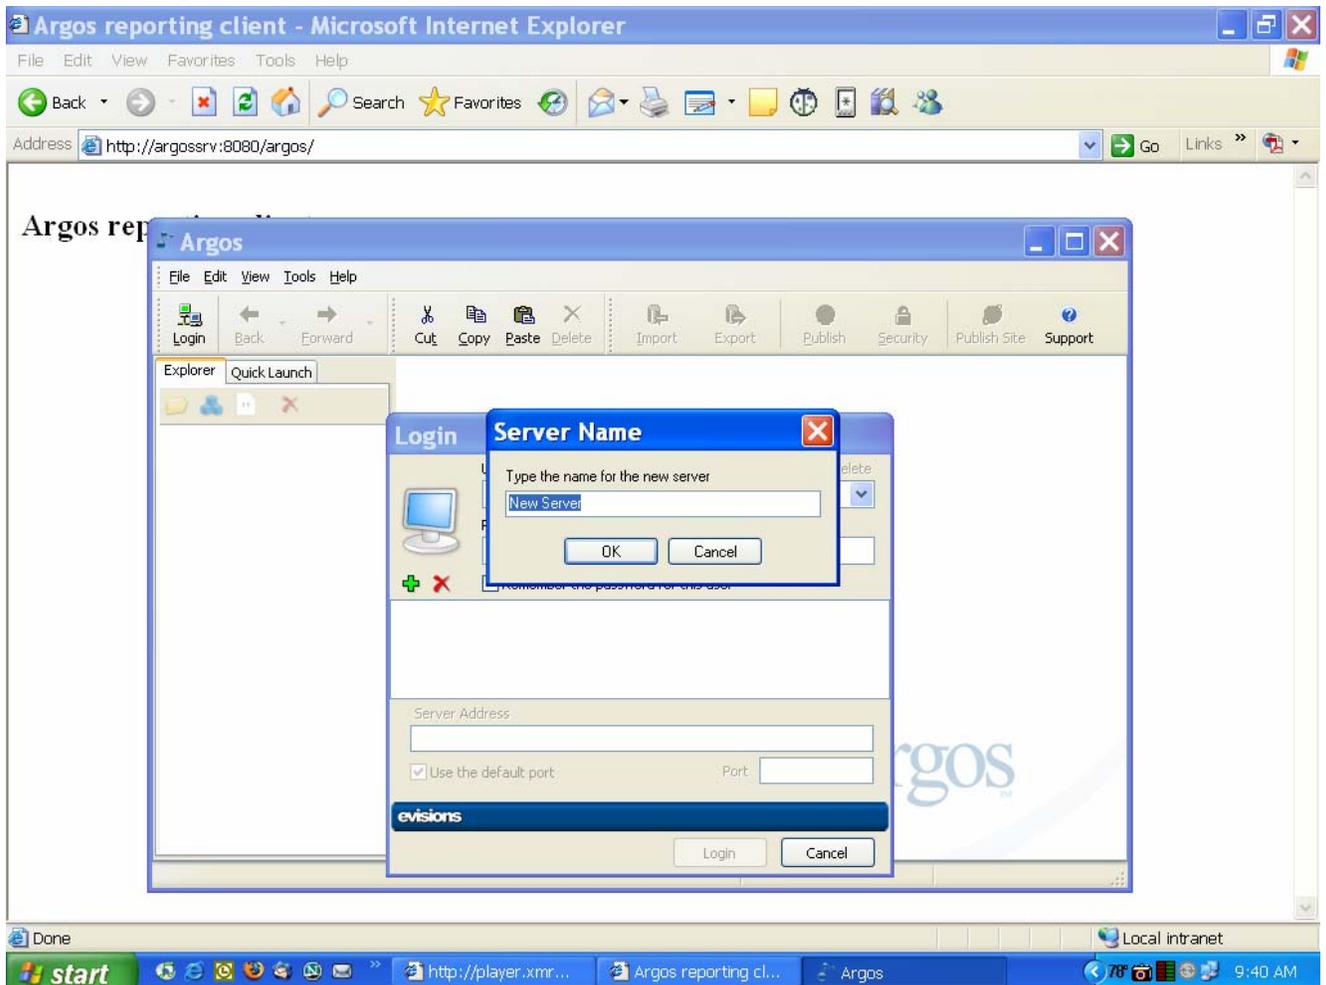

- Title: Login
- Username field with a "Forget this user" link and a dropdown arrow.
- Password field.
- Remember this user checkbox (unchecked).
- Remember the password for this user checkbox (unchecked).
- Edit Servers: Server: ARGOSSRV (ARGOSSRV)
- Version 3.0.2.241
- Buttons: Login, Cancel

To login, use your network id as the username and as the password.

If you logged in successfully you will get screen like in page 4. If so skip page 3 instructions.

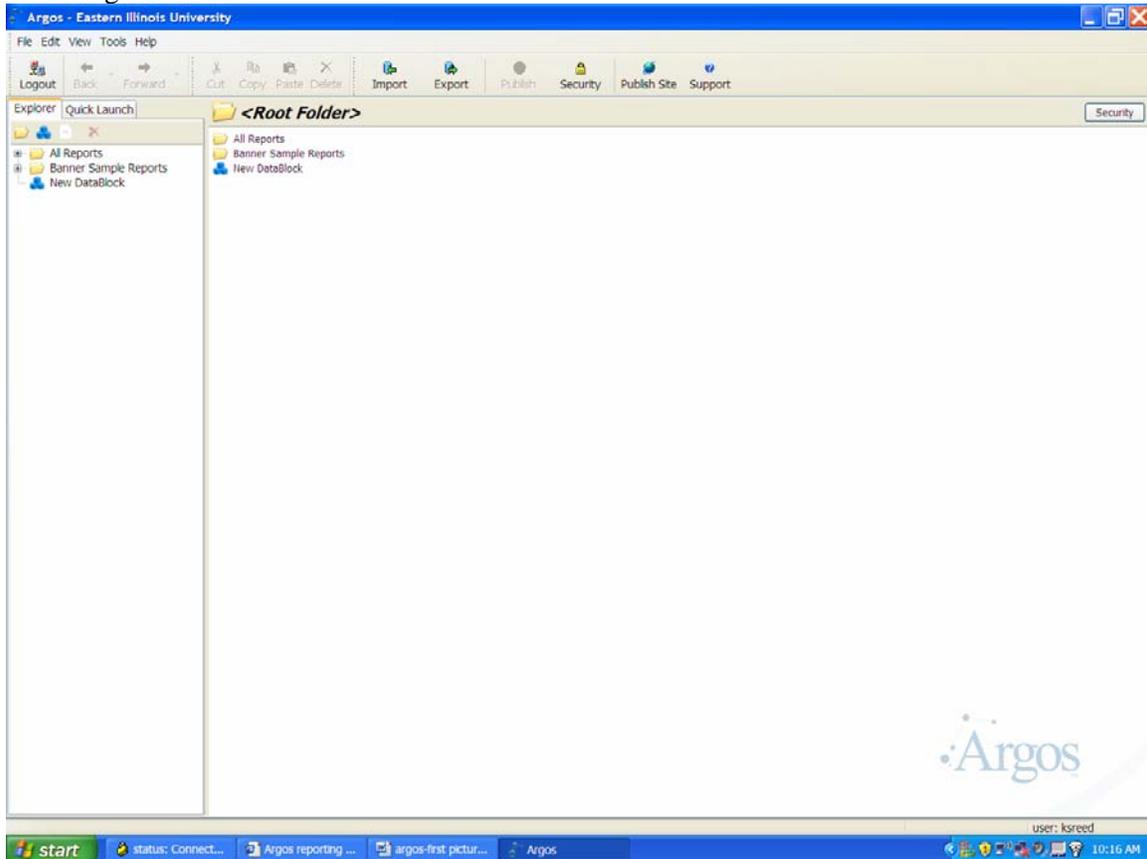

In some cases it asks to enter server name and IP address. In that case follow instructions on next page

Click on the green plus sign. (This task will only be performed on the initial installation.). You should receive a screen similar to the following:

Type in “Argosserver” for the name and click OK. For the server address, enter: 139.67.9.113; uncheck the box labeled ‘Use the default port’ and click Login.

You should now be logged in, ready to work in Argos, and receive a screen similar to the following:

When running a report, you may be prompted to 'choose a connection'. A connection is referring to the Banner instance you would like to use for executing the report. Choose one from the drop-down list.

If you have any questions Please call or E-mail
