## **Eastern Illinois University Sustainability Program**

To: Council on Graduate Studies

From: Austin Cheney, Dean, Lumpkin College of Business and Technology

Date: November 11, 2022

Re: Executive Action Request

Effective Date: Spring 2023

### **Action requested:**

Change software coding to house the MS in Sustainability program in Lumpkin College of Business and Technology, instead of the School of Technology.

### **Rationale:**

As an interdisciplinary program, the MS in Sustainability program has operated within the Lumpkin College of Business and Technology, However, the software codes the program as being listed under the School of Technology. This action is requested in order to eliminate confusion for students applying to the program.
