2. **Rationale for proposal:** State standards for the Reading Teacher endorsement specifically include coursework in the foundations of reading. In addition, this course will provide experience in the standards for developmental and remedial reading materials and resources. State standards for English as a Second Language endorsement includes coursework in applied linguistics for classroom purposes. Students in this course will not only grasp fundamental linguistics but will be able to apply those skills to the reading classroom, which is critical to language learners.

## **Model Syllabus (Part II)**

Please include the following information:

Course number and title: EDU 5350: Foundations of Reading: Linguistics and Literacy

Catalog description: Students will investigate language as a system, including phonology, morphology, semantics, syntax, discourse, and pragmatics as it relates to learning languages and connections to reading. Focus on both first and second language acquisition/development in the literacy domains will include instruction on accessing the curriculum for all learners.

Learning objectives:

1. Explain the developmental processes (emergent and pre-literacy skills progressing over time to proficient stages) associated with communication systems (e.g., listening, speaking, reading, writing, visually representing, and viewing)
2. Identify the components of the language system including phonology, morphology, syntax, semantics, aspects of social and academic language, and writing conventions
3. Analyze differences in literacy models of teaching and learning literacy
4. Analyze language differences in native and non-native speakers of English and understand these as indicative of language learning and developmental stages
5. Recognize the significance of comprehensible input, motivation, and value the significance of the cultural and social background of students, acknowledging the sociocultural variables affecting second language development while maintaining first language for ESL students
6. Select appropriate learning experiences that enhance the development of listening, speaking, reading, writing, visually representing, and viewing, including identifying a variety of assessment practices that are responsive to the strengths and needs of native and non-native English speaking students.
