

**Revision: B.S. Health Promotion: Emergency Management & Disaster
Preparedness Option**

Effective Date: Fall 2018

The Department of Health Promotion requests that the following language be added to the catalog description for the B.S. in Health Promotion:

Students may earn up to 12 s.h. of course credit in the major through Prior Learning Assessment (PLA). PLA evaluates the college-level knowledge and skills an individual has gained outside of the classroom, and determines if and how the knowledge and skills acquired translates to specific college-level courses. PLA awards credit for LEARNING, not just for experience or time “on the job”. Students who wish to earn course credit through PLA must consult with the academic advisor for their academic program, and follow the Department of Health Promotion approved process.

Rationale: An increasing number of students are entering our program with professional training and experience that is comparable to what is provided in some of our courses, but is not able to be transcribed in a useable way at EIU. PLA allows a mechanism by which such training can be evaluated for the Department, and if it is comparable to the student learning outcomes for particular courses, course credit could be awarded.

In conversations with prospective students currently employed in health-related professions, almost all have indicated that a significant reason they had not completed a bachelor's degree was because they feared having to take (and pay for) coursework that duplicated (or was less rigorous) than their professional training. These same individuals indicated that having PLA as an option removed that final barrier to returning to school.
