## Stress vs. Burnout

### The difference between stress and burnout

Causes of burnout

Dealing with burnout

Dealing with burnout tip 1: Turn to other people

Tip 2: Reframe the way you look at work

Tip 3: Reevaluate your priorities

Tip 4: Make exercise a priority

Tip 5: Support your mood and energy levels with a healthy diet

Stress	Burnout
Characterized by over-engagement.	Characterized by disengagement.
Emotions are overreactive.	Emotions are blunted.
Produces urgency and hyperactivity.	Produces helplessness and hopelessness.
Loss of energy.	Loss of motivation, ideals, and hope.
Leads to anxiety disorders.	Leads to detachment and depression.
Primary damage is physical.	Primary damage is emotional.
May kill you prematurely.	May make life seem not worth living.

## **BURNOUT, COMPASSION FATIGUE AND VICARIOUS TRAUMA ASSESSMENT**

Using the scale, indicate how these statements reflect your actions and feelings.

**5 = Very often; 4 = Often; 3 = Sometimes; 2 = Occasionally; 1 = Seldom; 0 = Rarely**

- 1. I am NOT happy and content with my work life.
- 2. I feel drained and exhausted from “giving” so much.
- 3. I am preoccupied with the traumatized stories I have heard.
- 4. I feel apathetic about work.
- 5. I feel down after working with those I help.
- 6. I think about traumatic experiences of a person I help too much.
- 7. I feel trapped by my work as a caregiver.
- 8. Because of my work as a caregiver I have been on edge.
- 9. Outside of work I avoid certain situations because they remind me of the experiences of those I work with.
- 10. I don't like my work anymore.
- 11. Because of my work as a caregiver I am exhausted.
- 12. I have intrusive thoughts of stories I've heard from those I'm helping.
- 13. I feel overwhelmed with the amount of work I have to do.
- 14. I wonder if I make a difference through my work.
- 15. I have flashbacks connected to my client.
- 16. I work too hard.
- 17. I become overwhelmed when thinking about working with certain clients.
- 18. I experience troubling thoughts about events of a client when I'm not working.
- 19. I feel I'm working more for money than for personal fulfillment.
- 20. I have felt trapped by my work as a caregiver.
- 21. I have involuntarily recalled my own traumatic experience while working with a client.

# Burnout, Compassion Fatigue, Vicarious trauma statistics

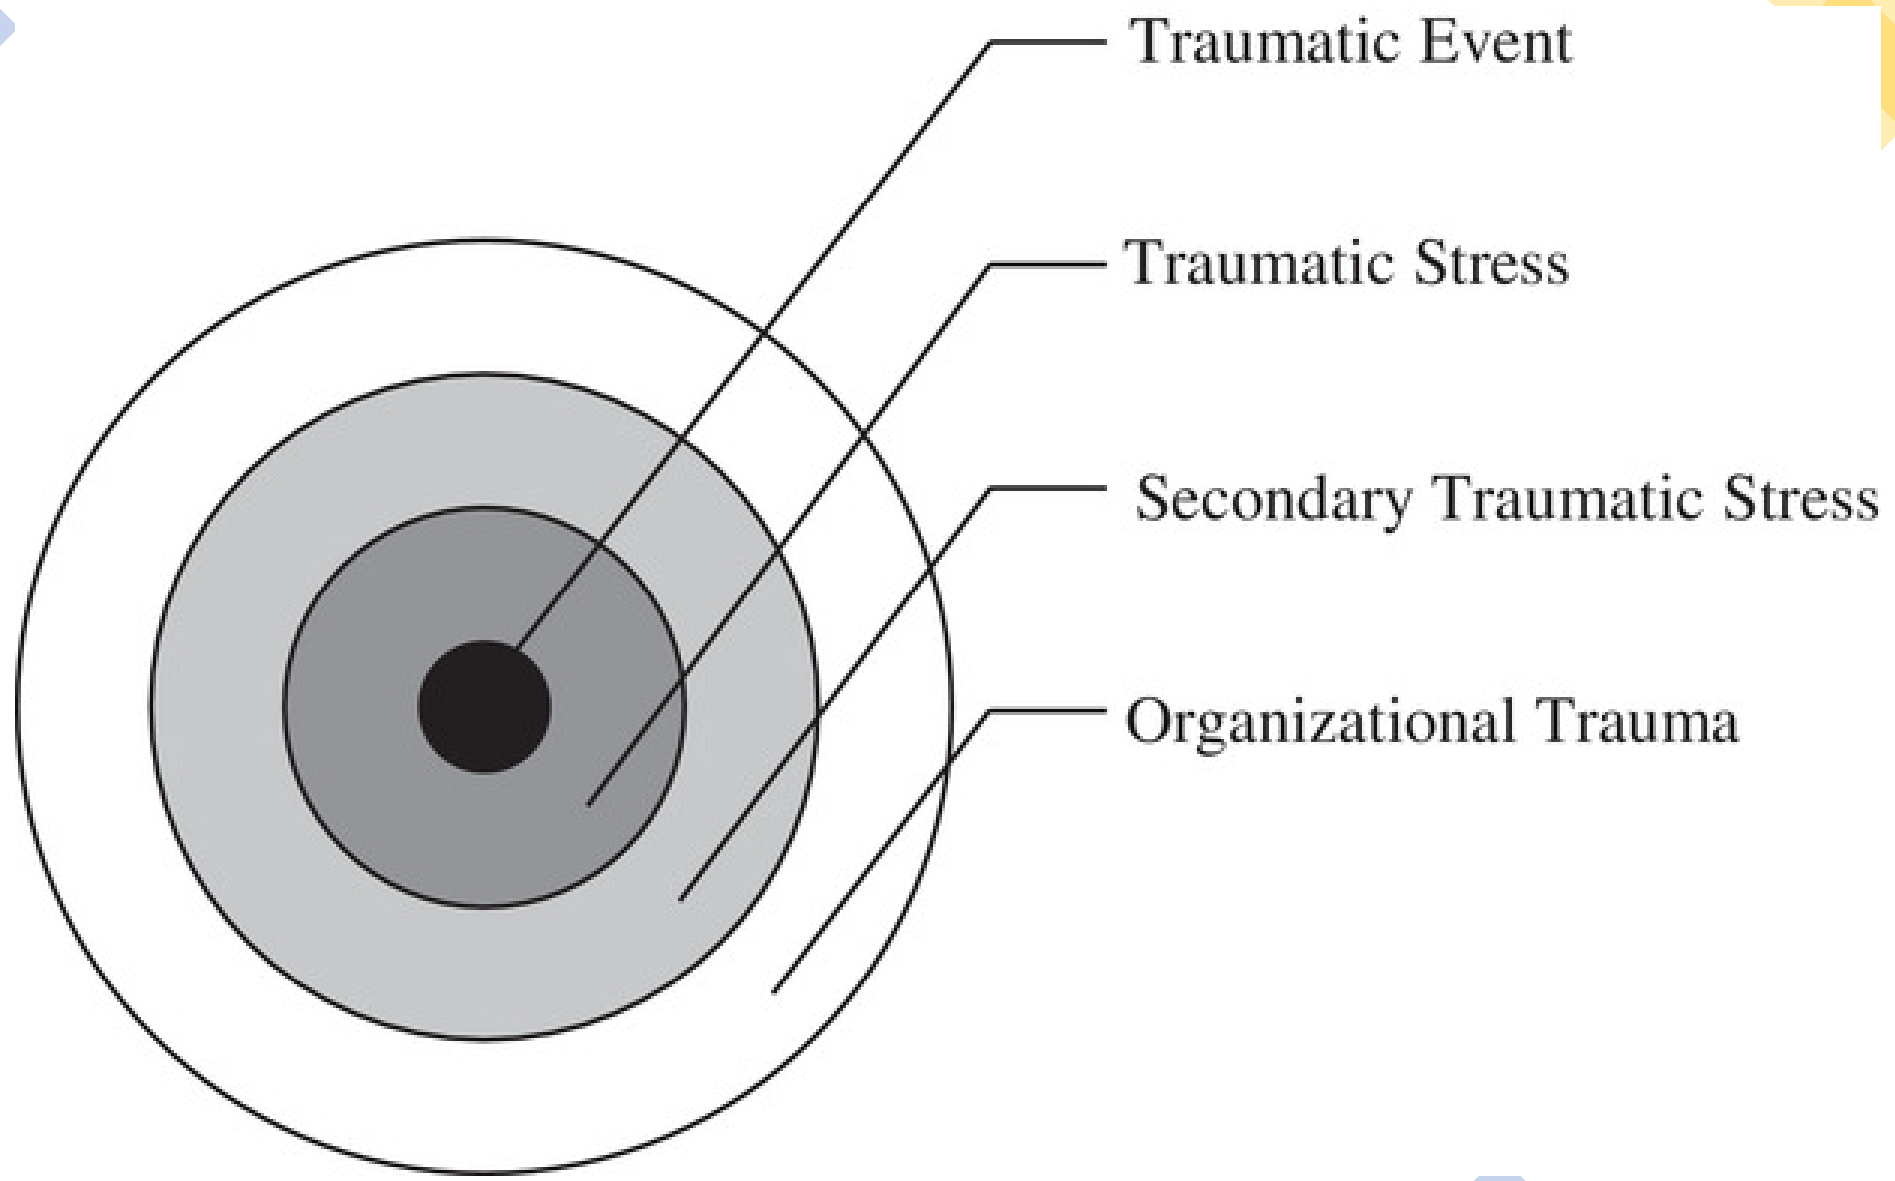

---

- Between 40% and 85% of “helping professionals” develop vicarious trauma, compassion fatigue and/or high rates of traumatic symptoms, according to compassion fatigue expert Francoise Mathieu (2012).
- 63% of psychologist surveyed in a study done by APA reported moderated levels of vicarious trauma in 2020.
- 2/3 of US employees say they have experienced burnout at some point
- Professionals whose caseloads consist of 60% or more clients with a significant trauma history are at increased risk of experiencing secondary trauma
- It is estimated the over half of college student affairs professionals support students through a traumatic life event on at least a monthly basis (Lynch, Jason, The cost of professional helping in higher education)

- 
- Suicide is the 11<sup>th</sup> leading cause of death
  - According to the CDC the number suicide survivors is over 5.8 million in the US
  - In a 2016 survey 25% of clinicians in an outpatient behavioral health setting had lost patients to suicide and clinicians who experienced a patient suicide displayed greater suicide prevention knowledge than and were more comfortable working with high risk patients
  - Suicide is the leading cause of death among college students
  - In 2022, 2% of college students surveyed said they had attempted suicide in the past year.<sup>[4]</sup> That's higher than reports from 2007-2021
  
  - Professionals need support processing their grief, guidance on potential legal issues, reassurance, and their own mental health

# After a client suicide or suicide attempt

- Feelings of grief, guilt, shame
  - Detachment
  - Loss can impact clinicians professional identify
  - Diminished relationships with co-workers
  - Affected ability to work with students/clients
- 
- Student affairs professionals/counselors and other helping professions may feel a sense of responsibility to their students/clients

Reverse

Resilience

# What can you do as an individual

---

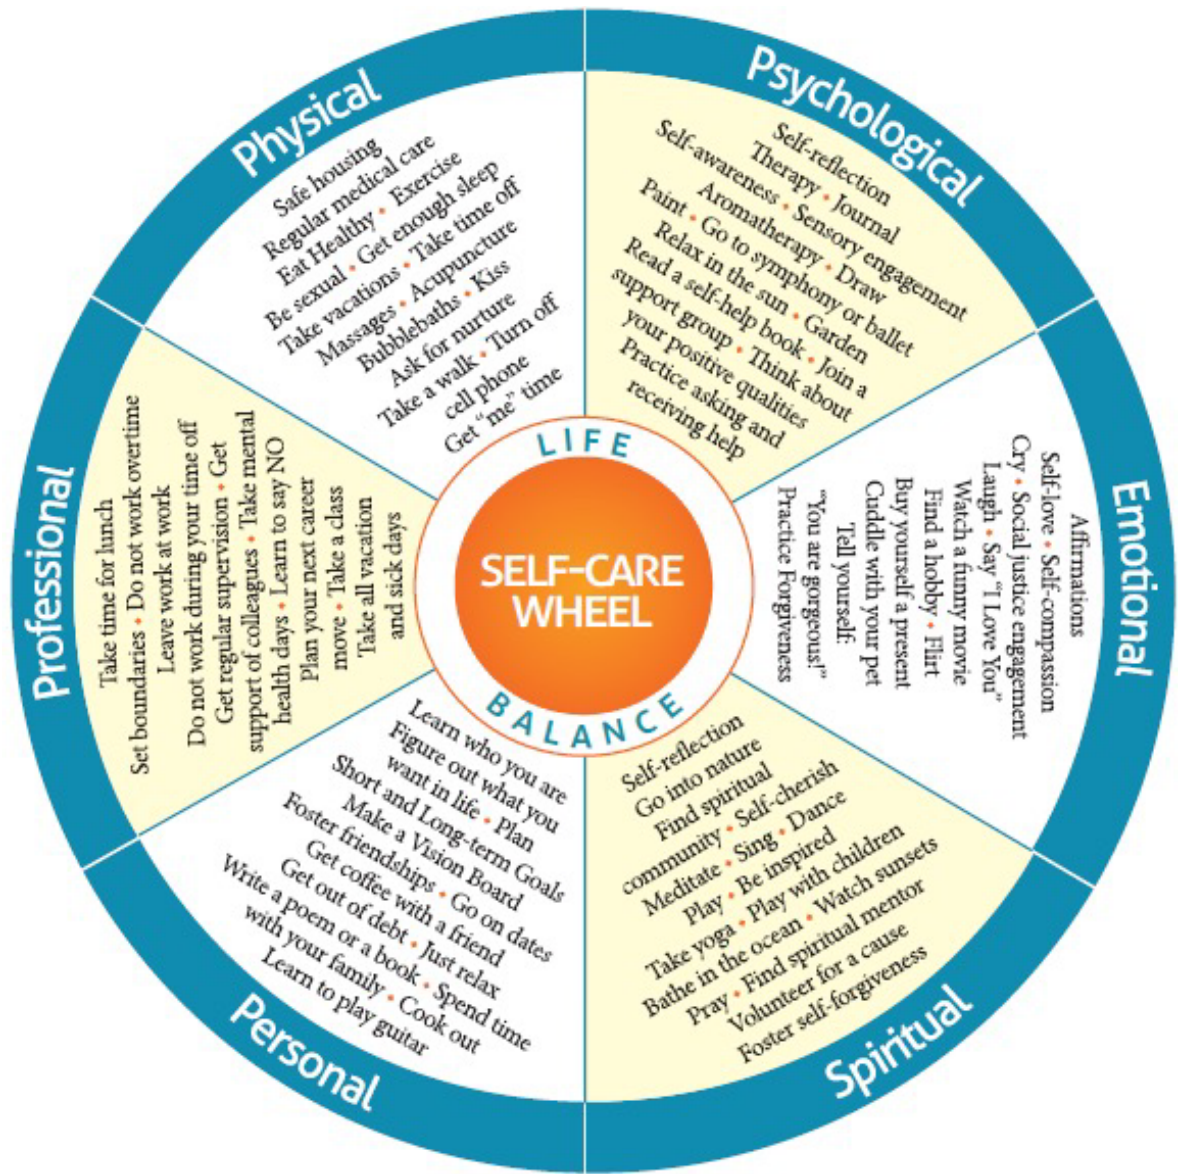

- Have work life balance- Take time off
- Build a strong support both inside and outside of work
- Talk to a mental health professional
- Set boundaries – It is okay to say “no”
- Learn your triggers
- Seek supervision and consultation
- Take care of physical needs

---

## Setting boundaries

- Be honest with yourself and your supervisor about how you feel
- Asking for help or saying “no”
- Taking an intentional “pause”
- Communicate clearly
- Manage interruptions
- Delegate if possible
- Seek support
- Give yourself compassion

# What can you do as an organization/supervisor following client suicide and/or traumatic event

- Staff debriefing post traumatic event/client Suicide
- Support staff members
- Link the staff member to an EAP program
- Modeling wellness
- Allowing flexible work schedules/time off
- Organizational leaders should assess staff wellness and crisis response

# What can you do as an organization/supervisor to prevent burnout, Vicarious Trauma, Compassion Fatigue

---

- Open communication
- Manage workloads
- Offer opportunities for professional development
- Remind staff importance of self-care
- Clear expectations
- Comprehensive supervision and trainings
- Create opportunity to for variety
- Create a vicarious trauma prevention plan-supervisors need to be aware of signs of trauma and educated on trauma informed practices
