

# Internship Sites 2020 - 2021

*ATTN CLINICAL COUNSELING STUDENTS: Beginning August 1, 2018, the Department of Healthcare and Family Services (HFS) introduced the implementation of Integrated Assessment and Treatment Planning (IATP). To support the application of the IATP, the Illinois Medicaid Comprehensive Assessment of Needs and Strengths (IM+CANS) was created as result of a partnership between HFS and the School of Social Work at the University of Illinois Urbana-Champaign, and Chapin Hall at the University of Chicago. The IM+CANS is a model that integrates assessment and treatment planning into a single process.*

*If you are planning on doing your practicum or internship at a government agency, you will be required to partake in a mandatory training session designed to familiarize you with the IM+CANS. You can find the training schedule here - <http://socialwork.illinois.edu/imcans-training-schedule/>. Please complete this training before starting at your site. You may reach out to your site in order to get costs covered for the training.*

## **BOURBONNIAS, IL**

- **Olivet Nazarene University Counseling Services (Added '20)**

**Contact:** Brianna Koch

**Address:** One University Way  
Bourbonnias, IL

**Phone:** (815) 928-5788

**Email:** [bnkoch@olivet.edu](mailto:bnkoch@olivet.edu)

**Website:** <https://www.olivet.edu/counseling-services>

**Site Description:** "We are in search of master and doctoral level interns and practicum students.

We provide counseling services to any full time undergraduate student enrolled at ONU who is interested in counseling. Our students seek our services to address any and all areas including depression, anxiety, SI, self-harm, eating disorders, homesickness, relationship issues, etc. ***We understand that our location can work against us so we do offer on campus housing as an option.***"

**Email:** [clinical@survivorresourcecenter.org](mailto:clinical@survivorresourcecenter.org)

**Services:**

**Counseling/therapy:** We offer individual, group, and family counseling services for victims/survivors of sexual abuse and their family members.

**Legal/Medical advocacy:** Advocates go to hospital calls for victims and assist victims and family members through the legal/court process (including doing Orders of Protection).

**Case Management:** We offer case management to any client and/or their significant others – assisting with a variety of needs, including housing, transportation needs, and referrals to other agencies.

**Education:** We provide education to all ages in the schools and to any community group. All of our services are free. We offer these services in Vermilion, Edgar, and Clark Counties to anyone who is a victim/survivor of sexual abuse and their family members. Age range for services is age 3 – adult. We are completely client-centered and offer the services in convenient locations in each community in addition to meeting at our main offices – whichever better serves the needs of the clients.

**Master's Level Intern** in Counseling or Social Work with Corizon Health at Wabash Valley Correctional Facility:

Corizon Health has the contract to provide medical and mental health services for the Indiana Department of Corrections (IDOC). The Master's level intern is technically a "volunteer" for the Indiana Department of Corrections at Wabash Valley Correctional Facility (WVCF), but would be clinically supervised by appropriately credentialed Corizon Health mental health staff.

Wabash Valley Correctional Facility is a maximum security men's prison with approximately 2,200 offenders. We have a very progressive and supportive mental health team. We have a mutually supportive and respected relationship with both custody and re-entry correctional professionals and work together closely as a multi-disciplinary team.

The mental health team at Wabash Valley Correctional Facility has an emerging culture of training and frequently have several levels of training going on at the same time within our mental health staff/team including postdoctoral psychologist(s), doctoral interns, doctoral externs/practicum students, Master's level interns in counseling and/or social work, and undergraduate interns in psychology, human services, and/or social work.

We have close to 700 offenders on our mental health roster, which makes us one of the largest psychiatric facilities in the state of Indiana. Master's students have an opportunity to work with a wide variety of diverse clients with diverse (and frequently complicated/traumatic) backgrounds. The student will have opportunity to work with basically any adult disorder that could be found in the *DSM-5*.

We train and certify most of our full-time mental health staff in Moral Recognition Therapy (MRT), an evidence-based treatment program for Antisocial Personality Disorder and Substance Abuse. While leaders of these groups must have the 32-hour facilitator certification in MRT, it is allowed for those in training, such as interns, to be co-leaders of such groups, which would be a very valuable experience for a Master's intern.

Master's students will be exposed to working on a multi-disciplinary team with seriously mentally ill offenders. Formal supervision will be provided at least one hour per week, most likely by one of our psychology doctoral interns as part of their Association of Psychology Postdoctoral and Internship Centers (APPIC) member internship training program. Social work interns will receive an additional hour from a licensed clinical social worker. The doctoral interns are supervised by doctoral level clinical and/or counseling psychologists with the Health Service Provider in Psychology endorsement, at least four hours per week. One hour of that supervision is focused on supervision of the supervision they provide to the Master's level intern. The Master's level intern may also attend weekly didactic presentations, as their schedule permits. These training opportunities are designed for the doctoral interns and cover a variety of topics related to becoming an independent practicing clinician in the mental health field.

Generally our primary psychiatric mental health team staffing meeting occurs each week on Wednesday. If possible, it would be a beneficial training experience to be able to attend this meeting. However, if that does not work for the Master's intern schedule, the supervisor can present his/her cases during that time, as needed.

We employ over twenty mental health professionals at our facility. We are very committed to training and recognize the importance of approaching the internship experience from a developmental perspective to help interns grow in their clinical skills and professionalism.
