Department of Counseling and Higher Education Eastern Illinois University

Dear Site Supervisor,

Thank you for agreeing to supervise a supervisee in the counseling program at Eastern Illinois University. Practicum and Supervised School Experience (Internship) are the culminating activities in the training of our supervisees and as such, requires the application of the counselor's competencies in actual counseling experiences with student and/or supervisees. This is both an exciting and anxious time for our supervisees as they look to you to help them grow professionally and hone the craft of counseling.

Our hope is that you will approach supervision seriously and look to make a significant impact on the professional life of our supervisees. Like counseling, supervising is not easy and requires professionals who are committed to facilitating a "dyadic activity whereby the supervisor facilitates the provision of feedback to the supervisee, which is based on the interpersonal communication between both members of the dyad and can pertain to the work in supervision, the supervisee, the supervisee's clients, or the supervisor" (Ladany and Inman, in press). Bernard and Goodyear (2009) defined supervision this way:

Supervision is an intervention provided by a more senior member of a profession to a more junior member or members of that same profession. This relationship is **evaluative**, **extends over time**, and has the simultaneous purpose of **enhancing the professional functioning** of the more junior person(s), **monitoring the quality of professional services** offered to clients...**serving as a gatekeeper** for those who are to enter the particular profession (p.8).

So, this relationship involves evaluating, enhancing, monitoring, and gate-keeping over a prescribed length of time.

We know from research that a well-organized practicum or internship with a clear idea of what is expected will result in a satisfactory supervisory experience (Baird, 2011). Therefore, we encourage you to plan ahead concerning what you expect from the supervisee and how supervision will proceed.

Of course this challenge applies to us as well. We also need to provide the same principles to how we set up practicum and internship so that you are prepared to provide an excellent supervisory experience for our supervisees. For this reason, we have developed a manual that will provide guidelines and tools needed to complete this academic requirement. We encourage you to read the manual and let us know if you have any questions. Along with the contract, this manual is a critical step in ensuring that our supervisees have the best experience possible and provides a successful bridge to their professional careers.

According to Boylan & Scott (2009), there are certain factors interns have stated are important to their successful growth during practicum/internship:

- » Clear expectations
- » Standards of accountability
- » Understanding the intern's needs
- » Being prepared for supervision
- » Providing purposeful continuity
- » Providing an equitable environment (if supervising more than one intern)

For this reason, this manual is designed to provide you with the minimum factors necessary to provide professional supervision for the supervisees.

Sincerely.

Dr. Heidi A. Larson, School Counseling Practicum/Internship Coordinator

According to Boylan & Scott (2009), there are certain factors interns have stated are important to their successful growth during practicum/internship:

- Clear expectations
- Standards of accountability
- Understanding the intern's needs
- Being prepared for supervision
- Providing purposeful continuity
- Providing an equitable environment (if supervising more than one intern)

For this reason, this manual is designed to provide you with the minimum factors necessary to provide professional supervision for the supervisees.

Practicum Introduction

Practicum is intended to combine course work with a 100 hour field experience conducted in a setting as similar as possible to that in which Practicum supervisees subsequently intends to seek employment. The nature of this experience should be very much like that of a regular counseling position, but with intensive supervision both on-site and on-campus. Because the Practicum experience occurs after supervisees have mastered basic-level communication skills and have taken a pre-Practicum course, the emphasis at this stage of their development must be upon training rather than service provision. Practicum sites and supervisors play a pivotal role in helping supervisees begin the transition into their professional identities. For this reason, developing a Practicum plan with sufficient emphasis upon professional development is extremely important.

Internship Introduction

M.S. in Counseling (School Counseling) – 60 hour program:

Internship is intended to be an intensive 900 hour field experience over three consecutive semesters (300 hours each semester) conducted in a setting as similar as possible in which the supervisees subsequently intends to seek employment. The nature of this experience should be very much like that of a regular counseling position, but with closer supervision than is usually the case with an employed counselor. Internship should occur at the end of the training program, and the supervisees are expected to put into practice the knowledge and skills previously acquired in their program. The level of training at the point of entry into Internship will insure that the arrangement will be mutually beneficial to the site and to the supervisees.

Student Records ASCA Ethical Guidelines

American School Counselor Association (ASCA) Ethical Code

A.8. Student Records

Professional school counselors:

- A. Maintain and secure records necessary for rendering professional services to the student as required by laws, regulations, institutional procedures and confidentiality guidelines.
- B. Keeps sole-possession records or individual student case notes separate from students' educational records in keeping with state laws.
- C. Recognize the limits of sole-possession records and understand these records are a memory aid for the creator and in absence of privileged communication may be subpoenaed and may become educational records when they are shared or are accessible to others in either verbal or written form or when they include information other than professional opinion or personal observations.
- D. Establish a reasonable timeline for purging sole-possession records or case notes. Suggested guidelines include shredding sole possession records when the student transitions to the next level, transfers to another school or graduates. Apply careful discretion and deliberation before destroying sole-possession records that may be needed by a court of law such as notes on child abuse, suicide, sexual harassment or violence.
- E. Understand and abide by the Family Education Rights and Privacy Act (FERPA, 1974), which safeguards student's records and allows parents to have a voice in what and how information is shared with others regarding their child's educational records.
