

## Wepman Auditory Discrimination Test (ADT) - (2<sup>nd</sup> Grader; Age 8)

**Wepman Auditory Discrimination Test (ADT)**, Second Edition, Form 2A

(administered February 22, 2007)

Author: Joseph M. Wepman

Copyright Date: 1987

**Purpose:** The purpose of this assessment is to measure the ability of the student to hear or discriminate among the phonemes in spoken language accurately.

**Description of Student's Behaviors:** Nathan seemed curious about this test, since he was seated with his back toward the clinician during the testing. He was able to answer accurately and quickly on almost all of his responses.

**Results:**

Total Score:	27
Standard Score:	48
Percentile Rank:	49
Qualitative Score:	0 (Average Ability)

### **Interpretation of Results:**

Nathan's Total ADT Score of 27 (Standard Score = 48) is at the 49<sup>th</sup> Percentile in relation to children between the ages of 8 years – 0 months and 8 years – 5 months. This indicates that his performance in regard to auditory discrimination ability is considered to be average for a student his age.
