Learning Model: Information-processing Model (Joyce, Weil & Showers, 1992)
This model enhances student attempts to comprehend acquiring and organizing data, sensing problems/generating solutions, and developing concepts (i.e., including the language needed to convey them). This model focuses on input, processing and output. As the content is taught, the teacher directs attention to the methods and materials used to present
the data, (e.g., advance organizers) and has students focus on what is occurring as it is assimilated (e.g., inductive thinking and questioning). This model provides the student with information while emphasizing concept attainment and hypothesis testing.

**Dispositions:**
Teaching candidates in the Department of EC/ELE/MLE will exhibit professional ethical practices, effective communication, sensitivity to diversity, and the ability to provide varied teaching practices evidenced in a supportive and encouraging environment.

**Course requirements and demonstrated competencies are aligned with the following standards:**
