

Department of Chemistry & Biochemistry

The 17th Annual Student Research Celebration

Thursday
Nov. 8th
5:30 PM

Room 3180
3rd floor Physical
Science Building

Meet students doing research and showcasing their posters; and meet with professors!

Research areas:

Microwave and laser spectroscopy

Synthesis of organic optical materials

Materials for photovoltaics

Bacterial carbon compound metabolism

Supramolecular assembly of interlocked molecules

*Studies of protein biochemistry with *C. elegans**

Studies of molecular containers, and more...

Reasons to join us:

To have an unbeatable résumé

To prepare for graduate or professional schools

To work on independent research projects

To present and publish your own work.....

To enjoy pizza and drinks!
