The Graduate School and the Graduate Student Advisory Council publish the Graduate Scholar annually to recognize and honor those who have achieved excellence in graduate study at Eastern Illinois University.

Awards Ceremony | April 12, 2012

Introductions and Opening Remarks

Ms. Kim Ensign, President of the Graduate Student Advisory Council

Dr. William L. Perry, President | Dr. Blair M. Lord, Provost and Vice President for Academic Affairs

Mr. Alex Dresen, Graduate Student Dean | Dr. Robert M. Augustine, Dean of the Graduate School

Distinguished Graduate Student Awards

College of Arts and Humanities
Announced by Dean Bonnie Irwin

Allison Cicero- Art

Presented by Mr. David Griffin

Pauline Matthey- Communication Studies

Presented by Dr. Olaf Hoerschelmann

Rashelle Spear- English

Presented by Dr. Ruth Hoberman

Crystal Abbey- History

Presented by Dr. Newton Key

Emily Irwin- Historical Administration

Presented by Dr. Nora Pat Small

Sarah Todd- Music

Presented by Dr. Marilyn Coles

College of Education and Professional Studies
Announced by Dean Diane Jackman

Jessica Leach- College Student Affairs

Presented by Mr. Lou Hencken

Breanna Way- Counseling

Presented by Dr. Heidi Larson

Ted Walk- Educational Leadership (Master's)

Presented by Dr. John Dively

Erin Conn- Educational Leadership (Specialist's)

Presented by Dr. Nick Osborne

Kalee Bengtson- Elementary Education

Presented by Dr. Linda Reven

Zachary Pope- Kinesiology and Sports Studies

Presented by Dr. Brent Walker

Nina Caputo- Special Education

Presented by Dr. Kathlene Shank

Lumpkin College of Business and Applied Sciences
Announced by Dean Mahyar Izadi

Tyler Hoke- Business Administration (On-Campus)

Presented by Dr. John Willems

Matthew McNeilly- Business Administration (Off-Campus)

Presented by Dr. John Willems

Caitlin Huth- Dietetics

Presented by Dr. Karla Kennedy-Hagan

Laura Lucas- Family & Consumer Sciences

Presented by Ms. Axton Betz

Nnenna Obi- Gerontology

Presented by Dr. Jacquelyn Frank

Robert Raschke- Technology (On-Campus)

Williams Travel Grants

Williams Travel Grants are awarded in the fall and spring, this year more students than ever before applied and received support for presenting their research at conferences all over the country. Due to the record high numbers of recipients, students will be announced by their college and program affiliation. Details of their outstanding research are listed in subsequent pages of this program.

Announcing the College of Sciences- Dr. Barbara Lawrence, Chair, Travel Grants Committee; Graduate Coordinator, Chemistry
Biological Sciences- *John Anderson, Evan Glynn, Corissa Lennon, Emily McCallen, Cassi Moody, Anthony Porreca, Bryan Rolfsen, Jason Stuck, John West*
Chemistry- *John Saathoff*
Clinical Psychology- *Sonia Shah*
Communications Disorders & Sciences- *Stephanie Fanale, Leigha Graham, Kate Harrington*
Economics- *Joseph Camp, Mahlet Gezahegn, Karun Gyawali, Meron Nadew*
Political Science- *Peter Foster, John Hanson, Holly Thomas*

Announcing the College of Education and Professional Studies- Dr. Carrie Dale, Member, Council on Graduate Studies; Member, Travel Grants Committee

Counseling- *Teresa Byars, Melissa Downs, Jennifer Gorman, Elizabeth Hartrich, Marilee Johnson, Lisa LaMasse, Loren Lindgren, Melissa McConaha, Diana Moon, Danessa Perdieu, Jana Roark, Jennifer Rose, Cynthia Sikes, Caleb Sims, Mendy Stephens, Hallie Thoele, Breanna Way, Janelle Williams*
College Student Affairs: *Matthew Nance*
Elementary Education- *Kalee Bengtson*
Kinesiology and Sports Studies- *Dominic Morais*

Announcing the Lumpkin College of Business and Applied Sciences- Dr. Peter Liu, Member, Travel Grants Committee; Graduate Coordinator, Technology

Business Administration- *Jackie Alexander, Nicole Goddard, Kaylee Hackney, Sergey Maximov*
Dietetics- *Jill Barnes, Lisa Heiser, Melanie Horstmann, Sarah Knoll, Stephanie Smith, Ashley Waters*
Family and Consumer Sciences- *Laura Lucas*
Technology- *Muhammad Rizwan*

Announcing the College of Arts and Humanities- Ms. Allison Cicero, Member, Travel Grants Committee; Graduate Candidate in Art

Communication Studies- *Catherine Bocke, Daniel Douglas, Pauline Matthey, Jessica McDonald, Christopher Wagner*
English- *Philip Gallagher, Jennifer Hudson, Rashelle Spear*
Historical Administration- *Lori Henderson*
History- *Crystal Abbey, Porri Hardings, Chady Hosin, Tom Kiely, Jonathan Matthews, Laura Mondt*

Research/Creative Activity Grants

Research/Creative Activity Grants are awarded in the fall and spring, this year more students than ever before applied and received support for conducting research in partnership with external agencies and institutions. Due to the record high numbers of recipients, students will be announced by their program and college affiliation. Details of their outstanding research are listed in subsequent pages of this program.

Announced by Dr. Ed Wehrle, Chair, Research Grants Committee; Graduate Coordinator, History

College of Arts and Humanities-

Art- **Jan Kappes, Allison Cicero, Adam Dupuis, Jaclyn Mednicov, Brandon Schawel, Gillian Tobin**

College of Education and Professional Studies-

Counseling- **Daniel Applegate, Sharon Kim, Melissa McConaha, Daniel Osterloo, Danessa Perdieu, Daryll Small, Hallie Thoele, Bobbi Ward, Breanna Way**

College of Sciences-

Biological Sciences- **John Anderson, Evan Glynn, Sarah Huck, Corissa Lennon, Emily McCallen, Cassi Moody, Anthony Porreca, Bryan Rolfsen, Dilini Samarajewu, Jason Stuck, Amanda Wildenberg**

Communication Disorders & Sciences- **Stephanie Fanale**

Graduate Scholarships

Announced by Dr. Stephen Lucas, Chair, Scholarship Committee; Graduate Coordinator, Master Teacher

Presented by Dr. Newton Key, Member, Council on Graduate Studies; Member, Scholarship Committee

Ahmed Abou-Zaid, Ph.D., Assistant Professor of Economics, Faculty Mentor

***Forecasting Foreign Exchange Rates Using Artificial Neural Networks:
A Trader's Approach***

This thesis is an attempt to forecast the foreign exchange rate of three major currencies: The Euro, the Yen, and the British pound against the U.S. Dollar, for trading purposes. The use of traditional techniques such as Autoregressive (AR), Moving Average (MA), or Autoregressive Integrated Moving Average (ARIMA) have major shortcomings notably related to the accuracy of the predicted values. This research paper, thus, utilizes a fairly new technique, which is Artificial Neural Networks (ANNs), which are powerful when applied to problems whose solutions require complex relationships. It also has an advantage over standard models in that they do not require a specified functional relationship between the input and output variables. The results from the neural network model exhibited that using technical indicators as input values can lead to significant market timing ability. The two neural network types, used in the exchange rate forecasting, proved to be forecasting at a higher accuracy (sign prediction) than random walk or ARMA models discussed in the literature.

John Stromski, Master of Arts in English

Chris Hanlon, Ph.D., Associate Professor of English, Faculty Mentor

Distorted Domesticities: Hawthorne and the Democratic Domestic Sphere

Nathaniel Hawthorne held three political offices over the course of his life—his positions at The Custom Houses of Boston and Salem as well as consulate to England—yet his involvement in politics has traditionally been regarded as limited—his forays being his authorship of *The Life of Franklin Pierce* and “Chiefly About War Matters.” While he received the political appointments from the Democratic Party, Hawthorne continually presented himself as apolitical throughout his life.

Although Hawthorne tried to control his political identity by writing about domestic matters which marginalized the political sphere, the domestic matters were grounded in partisan ideology. The romance genre in particular—acting as a metaphysical medium between the real and the imaginary—through its creating, questioning, and distorting of domestic relations, served as a way for Hawthorne to crystallize the values of the Democratic Party. Through this distortion, Hawthorne is able to reify Democratic values relating to the domestic sphere, grounding his ideology in the re-creation and sustenance of the family unit.

While critical discussion of Hawthorne's politics has tended to focus on race and gender, no scholarly work has been done examining the domestic sphere in relation to political and familial ideologies. I argue that Nathaniel Hawthorne, by distorting domestic relations throughout his literary career, was politically engaged in a way that reified Democratic ideals by displaying the inadequacies of a discontented domestic sphere. Through these domestic distortions, Hawthorne grounds a national identity within the familial identity, subjecting national values to family values. The subjection of national values to values within the domestic sphere created a national identity dependent upon, strengthened in, and threatened by ties of blood, which thereby connected states to the Union, the domestic sphere to the public sphere, and individuals to their pasts.

***Comparison of Nutritive Value, Cost, Viscosity, and Acceptability
Among Three Researcher-Developed Oral Nutritional
Supplements and a Standard Commercially Prepared Supplement***

The consumption of oral nutritional supplements may help prevent, or delay, malnutrition in the older adult population. Developing acceptable supplements, and discovering alternative methods to providing nutrition to older adults, is vital. The purpose of this study was to develop and evaluate three oral nutritional supplements in chocolate, strawberry, and vanilla flavors that were similarly priced and contained similar nutritive value as compared to the standard commercially-prepared supplement Ensure®. The study also focused on the comparison of appearance, smell, flavor, aftertaste, viscosity, and overall acceptability and preference between the researcher-developed and standard supplements. The researcher-developed supplements were less expensive per serving than the standard supplement and significantly more viscous than the standard supplement; yet the researcher-developed supplements were nutritionally comparable. An expert panel of eight registered dietitians evaluated the researcher-developed and standard supplements during sensory evaluations. The expert panel rated the standard chocolate, standard strawberry, and researcher-developed vanilla supplements more acceptable than their corresponding flavor supplement. However, after considering each supplement's quality characteristics overall, panel members indicated they would prefer to consume the standard strawberry, researcher-developed chocolate, and researcher-developed vanilla supplements over their corresponding flavor supplement. All supplements were recommended for older adult patients/clients by panel members. As a result of this study, older adults have a palatable, economical, and expert-recommended oral nutritional supplement that can be made in the comfort of one's home as an acceptable alternative to the standard commercially-prepared supplement.

***Special Education Teachers' Perspectives of the
Functional Behavior Assessment Process***

Prior to this study the literature on functional behavior assessments (FBA) focused on researchers as implementers. Other studies questioned state and district level special education administrators. Little FBA research involved teachers even though they were indicated as the largest group responsible for the process in schools. The purpose of this study was to investigate special education teachers' perspectives of the FBA process. Ninety-eight graduates two or more years out of a regional comprehensive university completed a survey about their districts' assessment methods and behaviors warranting FBA development. Personal perceptions of the FBA process were also explored. Overall, participants indicated concerns about the time required to complete FBAs and lack of training although they did value the process. They also signified school psychologists and social workers as key professionals involved in FBA creation. When compared by grade levels, some variance was found in the behaviors resulting in an FBA and assessment methods used; however, only two statistically significant differences were discovered. The utilization of student interviews was the only assessment technique and absences/truancies the lone behavior. Results of this study are significant for the field of special education and the future of FBAs. Differing teacher views on the process and procedures indicates the need for specific policies. At this time, no mandates for FBAs exist except for their required use to target behaviors. Likewise, teachers' concern about the time commitment to complete FBAs should guide further research on the fidelity of the process and ways to modify it. Other groups of individuals involved in the process should also be surveyed or interviewed. Teachers indicated they valued the FBA process; therefore, changes must be made to make it most effective for the students it serves.

*Effect of Surface Hydrophobicity on
Adhesion Force Probed by Atomic Force Microscopy*

With horrific memories of the dust bowl during the Great Depression, soil erosion is etched into the collective memory of this country. It is common knowledge that wet sand can be molded into sand castles, but dry sand cannot. This is a result of the enhanced inter-particle attraction between wet compared to dry sand particles. Pure sand is quartz, the major constituent of many soils. Given this, it may not be surprising to learn that dry soils are more susceptible to wind erosion than wet soils. The working hypothesis here is that as a result of heat produced by fire, plant matter is volatilized and deposits onto soil (i.e. quartz) particles. This plant matter consists largely of long chain fatty acids, which renders the soil hydrophobic (water hating) upon deposition. The soil thus becomes more susceptible to wind erosion. Theoretical models have been used to describe such behavior, but direct measurement of soil inter-particle adhesion as a function of relative humidity and hydrophobicity have not been reported. Atomic force microscopy outfitted with a small quartz particle on the tip was used to directly measure the inter-particle adhesion (on the order of nanonewtons) with model quartz surfaces, as well as real soil particles before and after exposure to fire in field work. This work showed that the inter-particle forces for hydrophilic (water loving) surfaces do in fact increase with relative humidity, but that increase happens surprisingly abruptly. Another surprising result is that for the most hydrophobic, water repelling surfaces, the opposite trend occurs but less dramatically so. Thus to minimize wind erosion different strategies may be invoked depending on regional humidity levels. In the high relative humidity southeast hydrophilic soils would result in less wind erosion, while in the low relative humidity southwest hydrophobic soils would exhibit less wind erosion.

King- Mertz Research /Creative Activity Awards

Nancie King Mertz, '79 graduate alumna from the program in Art, established the King-Mertz Research/Creative Activity Awards in 2010 to recognition the highest achievement in graduate research based on non-thesis graduate research/creative activity projects. A 2009 recipient of an Outstanding Graduate Alumni award, Nancie has been actively involved in the visual arts as both a creative artist and a small business owner. She and her husband Ron own and operate ArtDe Triumph & Artful Framers Studios in Chicago's Lincoln Park.

One project is selected to represent the best non-thesis project from all graduate programs and a top project from each academic college is also selected.

King-Mertz Distinguished Research/Creative Activity Award

Pamela Machala, Master of Arts in Music
Paul Johnston, M.M., Associate Professor of Music, Faculty Mentor

Jazz Language in Bernstein Song

For my graduate recital in April of 2011, I arranged and performed six songs by twentieth-century American composer Leonard Bernstein in a variety of jazz styles. I also performed a song of my own, written in the style of Bernstein. In conjunction with the recital, I wrote a recital analysis paper in which I investigate the distinctive compositional style and use of jazz language by Bernstein. The paper analyzes the following songs: “Some Other Time,” “Lucky To Be Me,” and “New York, New York,” from his 1944 musical *On The Town*, and “Cool,” “America,” and “Tonight,” from his 1957 musical *West Side Story*, as well as “Lenny,” my original song. The body of the paper examines the harmonic, melodic, rhythmic, and formal characteristics of each song, as well as the interaction of the music with the text. I also describe my own arrangements and treatments of the songs, explain why I chose to arrange them in certain styles, and how the songs became vehicles for jazz improvisation. My intent was to give Bernstein’s songs a fresh treatment that still maintained the integrity of the original works, and to highlight Bernstein’s use of jazz language in his writings for the musical theater genre.

The Colonial Imagination: The Formation of German National Identity

“The Colonial Imagination: The Formation of German National Identity” is a historiographical project highlighting works that have utilized a culturalist model of colonization in order to establish a relationship between colonial space and national identity. Cultural studies and postcolonial theory have only recently begun to gain a foothold in the investigation of the German colonial enterprise and its subsequent effect on national identity. The culturalist approach departs from an earlier historiography focused on Imperialism, which, due to an emphasis on material rather than ideological, is far less relevant for Germany because their colonies lacked economic viability. Consequently, in recent years German scholars have begun to explore the German colonial imagination rather than its formal enterprise by building off the seminal works of Edward Said and Benedict Anderson. The historians mentioned in this project, by incorporating the theoretical frameworks of Edward Said’s *Orientalism* and Benedict Anderson’s *Imagined Communities*, highlight the ideological undercurrents and precursors that facilitated the moral degeneration of ordinary men under the National Socialist regime.

Germany’s colonial imagination provided the arena for the construction of a national identity in opposition to the national characteristics of others. The German colony was largely a fictional construct buttressed by circulating colonial literature. At the center of this fiction lay the structural foundations of Nazi ideology: race and space. The imagined elements of Germany’s colonial experience racialized the right to space and solidified the collective German community’s position in a perceived racial hierarchy. This paper, therefore, highlights a particular vein of historiography that explores the link between Germany’s imagined imperial experience and national identity in order to better understand how a colonial imagination helped shape the internal and external perception of the collective German community.

An Empirical Study of Student Willingness to Study Abroad

Companies wish for universities to provide business students with international education and awareness. Short- and long-term study-abroad programs are an effective method by which this is accomplished, but relatively few American students study abroad. In response to these facts, this study develops hypotheses that predict student willingness to study abroad and tests the hypotheses using a survey of over 300 primarily-business undergraduate students at a public Midwestern university. Results indicate that personal, situational, and location variables influence students' willingness to study abroad; completing an international business class had no effect. Implications for international business scholars are discussed.

Child Senior Relationship Therapy: From passionate idea to applicable possibilities in the school system

One in every five students suffers from a mental health issue (Mash & Dozois, 2003). The ASCA recommends a student to school counselor ratio of 250:1. The site for the study has a ratio of 755:1. This study provides a proposal for crucial volunteer services to fill the gap for overburdened school counselors. Child-Parent Relationship Therapy is a treatment model where play therapists train parents to utilize play therapy to facilitate the child's adjustment (Landreth & Bratton, 2006). Children receiving CPRT show decreases in problem behaviors in the home and classroom and increases in adaptive functioning (Landreth & Bratton, 2006). This project is a follow-up of a pilot study adapting CPRT with senior citizens who often possess untapped abilities and talents. The researchers propose improvements in adaptive functioning for both parties. Seniors receive several weeks of training and supervision on videotaped play sessions. They meet with children for ½ hour sessions for several weeks. This study is a pre-test post-test design. Childhood adjustment problems are assessed before & after the intervention using CBCL (filled out by parents) and TRF (filled out by the child's teachers). Senior's responses are measured before & after with the Older Adult Self-Report, the Measurement of Empathy in Adult-Child Interaction, & qualitative interviews. This study will be presented at the Illinois Association for Play Therapy in February 2012 and addresses the following hypotheses. 1.) Are there significant differences between pre- & post-test measures for children or senior citizens? 2.) Do senior citizen volunteers improve their ability to empathize & provide play therapy? 3.) What are the experiences of children, seniors, and school personnel in this study?

Structural Change and the Evolution of Americans' Average Incomes

The issue of income inequality in America has recently become one of renewed contention. While measures of income distribution show that inequality has increased markedly in the past four decades or more, this paper focuses solely on the changes in average incomes earned by each of five quintiles and by the top five percent of earners. The top five percent have enjoyed the largest increase in average income since 1970. Income for the entire top quintile has gained the next most, while each of the consecutive lower quintiles experienced increasingly less growth in their average incomes. Of the social and economic determinants of these trends, the modern growth of the services sector is found to be most significant in its positive association with average incomes at every level. Secondary education enrollment is positive significant in affecting the variation of incomes for the middle three quintiles. As a percentage of GDP, government expenditure is negative significant in its association with average incomes for every group. Time periods were distinguished by their respective decade and analyzed both empirically and intuitively with respect to their influence on income trends. The paper argues that the structural change set in motion during the 1970's is a key determinant of the various income trends.

Williams Travel Grants

Named for **Larry Williams**, Ph.D., dean of the Graduate School from 1976 to 1999, the Travel Grants provide support for students to present their research at regional, state, national or international conferences. These awards have been supporting graduate student travel since Dean Williams' retirement in 1999. The grants are awarded in the fall and the spring, and the number of graduate students applying and receiving assistance this year for travel surpassed all previous years' numbers.

2012 Teaching Award of Excellence for Graduate Assistants

The graduate assistant selected from EIU is nominated at the Midwest Association of Graduate Schools.

Emily McCallen, Masters Candidate in Biological Sciences

2011 Betty Wright Downing Graduate Scholar

Established by Mr. and Mrs. Harry T. Wright in memory of Betty Wright Downing.

Leigha Graham, Masters Candidate in Communication Disorders and Sciences

2012 Frances Meyer Hampton Graduate Scholar

Established by Mrs. Frances Meyer Hampton in her estate, this award is presented annually to a full-time student in a master's degree program.

Jill Vogt, Masters Candidate in Communication Disorders and Sciences

2012 Mary Bear McClay Graduate Scholar

Established in 2004 by siblings Wilfred (Bill) McClay and Susan Foote, in memory of their mother, Mary Bear McClay.

Monica Atkins, Masters Candidate in Mathematics Education

2012 Annie Weller Graduate Scholar

Established by the family of Annie L. Weller to provide financial support for a full-time undergraduate or graduate student majoring in the social sciences, history, or physical sciences.

Md. Tanvir Pavel, Masters Candidate in Economics

2012 Rodney S. Ranes Outstanding Graduate Faculty Mentor Award

Established by Rodney S. Ranes, former director of graduate admissions, this award is selected by the Council on Graduate Studies Ranes Board to honor outstanding graduate mentoring.

Ryan Hendrickson, Ph.D., Professor of Political Science

Hamand Society of Graduate Scholars

Named in honor of the first dean of The Graduate School, Dr. Lavern Hamand, the Hamand Society recognizes degree-seeking graduate candidates nominated from among the class of Distinguished Graduate Students whose achievements in both scholarship and service have had a documented impact on the discipline and the community. The quality and impact of the scholarship and service achievements of Hamand Society Scholars reflect the highest ideals of the engaged graduate student.

Dean Hamand was a professor of history and served as dean from 1967 to 1974. Before her passing in 2011, his widow Martha provided support for the Society, which was created in 2010. Their children, Carol Stephens, Wendy Venet, and Jeff Hamand continue their parent's legacy in supporting graduate education at EIU.

2012 Hamand Scholar

Anthony Porreca, Masters Candidate in Biological Sciences

2011 Hamand Scholars

Last year marked the inaugural year of the Hamand Society of graduate scholars. Three students were inducted: Andrew Durso (biological sciences), Dominic Morais (kinesiology and sports studies), and Justin Schuch (college student affairs). Today **Andrew Durso** is pursuing doctoral studies at Utah State University in Logan, working with Dr. Alan Savitzky on the ecology, physiology, and behavior of toad-eating snakes. This summer he will be teaching the course, Biodiversity of Utah. **Dominic Morais** is in the Interdisciplinary Sports Studies PhD program at the University of Texas at Austin where he studies physical culture, specifically the Iron Game. He received a William C. Powers Graduate Fellowship and recently had an article accepted in *Iron Game History: The Journal of Physical Culture*. **Justin Schuch** works full time at Southern Illinois University Carbondale as Hall Director, overseeing Bowyer, Brown, Felts, and Steagall Halls, and advising the Residence Hall Association on campus. He is working to get the needed experience before starting a terminal degree program in higher education.

firstchoice
GRADUATE PROGRAM
EASTERN ILLINOIS UNIVERSITY

Graduate programs achieving the distinction of “First Choice” have applied and been subjected to rigorous review from EIU’s Council on Graduate Studies, with oversight from the Graduate School, to ensure they meet the highest standards of scholarly excellence as evidenced through sustained achievement of criteria developed and adopted by the Council in 2006.

Programs achieving First Choice designation 2009-2013:

History and Historical Administration; English; Communication Disorders and Sciences; College Student Affairs; School Psychology

Programs achieving First Choice designation 2010-2014:

Gerontology, Political Science

Programs achieving First Choice designation 2011-2015:

Biological Sciences

Programs achieving First Choice designation 2012-2014:

Counseling

Programs achieving First Choice designation 2012-2016:

Clinical Psychology

EIU Graduate School Receives the ETS/CGS Award for Innovation in Promoting Success in Graduate Education

The third annual “ETS/CGS Award for Innovation in Promoting Success in Graduate Education: From Admission through Completion” was presented to Eastern Illinois University during the 51st Annual Meeting of the Council of Graduate Schools. The award is sponsored by the Council of Graduate Schools and Educational Testing Service. Robert Augustine, dean of the graduate school, accepted the award on behalf of EIU. The award recognizes promising, innovative proposals to enhance student success and degree completion at the master’s or doctoral level, while promoting inclusiveness. The winning institution is selected based on the strength of its proposal to meet the award’s goals and to serve as a model for other schools; it receives a two-year, \$20,000 matching grant.

The winning proposal from EIU, “The Integrative Graduate Studies Institute,” will offer a full range of services designed to promote success in graduate education, including five integrative graduate mentoring programs. The programs will focus on distinct audiences, both undergraduate and graduate students, and will be evaluated on outcomes related to diversity, retention and completion rates, and other metrics.

“From pre-admission through to degree completion graduate students face many challenges and hurdles to success,” says David G. Payne, vice president and COO of ETS’s Higher Education Division.

“Eastern Illinois’ comprehensive proposal specifically addresses these challenges in a positive way and we congratulate them for their efforts on behalf of students.”

“Eastern Illinois University was the best of a very strong set of proposals, all of which showed the commitment that graduate schools have to promote student success in graduate programs through creative approaches,” said Debra W. Stewart, CGS president. “CGS is exceptionally grateful for ETS’s continued support for graduate education as exemplified by this award.”
