

Medical Visit Documentation Notice

Effective August 3, 2009

A student whose instructor or employer requires documentation of an illness or other medical condition, treated by the University Health Service, may request a “Patient Receipt”. The receipt is generally available within 1-2 business days after a patient visit. All patient information from the appointment must be entered into the patient’s chart before a receipt may be provided.

Only instructors or employers may excuse a student from class or work obligations. The Health Service does not provide written excuses for class or work absence.

Appointments for the sole purpose of obtaining medical documentation limits appointment availability for those who are most in need of medical services.

Thank you.

Policy Statement

**Medical Visit Documentation for Class
or Work Absence
Effective August 3, 2009**

The Health Service does not provide written excuses for class or work absence. The responsibility of Health Service is to treat students who are ill or injured and to provide education and services regarding health related issues. These programs and services are provided to enhance the ability of students to participate fully in intellectual and personal growth opportunities afforded by the University.

Health Service makes every attempt to schedule a medical appointment around a student's class or work schedule to avoid a conflict of missing class or work obligations. The Health Service will not accommodate visits for the sole purpose of obtaining verification of a visit.

Class attendance is an administrative matter between the faculty and the students. Only faculty or an employer may excuse a student from class or work obligations.

If a student is evaluated at the Health Service for an illness or injury, we will provide specific instructions for class or work attendance for two reasons only: 1) cases in which the student is at risk of exposing the illness to others and/or 2) situations in which attending class will hamper recovery from the illness or injury. Health Service will continue, to recommend absences for prolonged or serious illnesses. This documentation may come from Health Service or the Registration Office depending on the duration of the recommended absence.

If required by an instructor or employer, a student may obtain medical documentation from the Health Service. Medical documentation is generally available within 1-2 business days. Students may also sign an "Authorization to Release Patient Information" if it is necessary to discuss the student's personal health information with faculty or employers.

Copies of the above policy statement are available at the Health Service. Questions regarding this policy should be referred to the Director of Health Service or the Medical Director. This policy, a policy letter to the Eastern Community, and a notice bulletin are available on the Health Service website.

CLASS ATTENDANCE

Students are expected to attend class meetings as scheduled. When an absence does occur, the student is responsible for the material covered during the absence. When possible, the student should notify the instructor in advance of an anticipated absence.

Instructors will grant make-up privileges (when make-up is possible) to students for properly verified absences due to illness, emergency, participation in an official University activity, or participation in volunteer emergency work); and such absences will not militate against students in classes in which attendance is used directly in determining final grades. It is the student's responsibility to initiate plans for make-up work and to complete it promptly. If in the instructor's judgment the duration or number of absences renders make-up unfeasible, the instructor may contact the Vice President for Student Affairs and the Department Chairperson to determine an appropriate action.

Except for the above stipulations, each instructor sets his or her own policy with respect to class attendance and make-up work; and excuses for absences are handled between the instructor and the student. At the beginning of each grading period, the instructor shall announce, in writing, his or her policy regarding absence, make-up and late work. Instructors planning to use attendance directly in determining final grades must have written department approval and must indicate this intention and the reason, in writing, on the first day of class.

A student whose instructor requests verification of an illness treated by the University Health Service may request a documentation of the visit to share with the faculty member. If a student establishes a record or pattern of absences of concern to the instructor, the instructor may ask of the Vice President for Student Affairs that inquiries concerning the absences be made. The Vice President for Student Affairs also serves as the University contact person when catastrophic events result in extended student absences.

Any student who feels that he or she has been treated unfairly concerning absences or has been misinformed by a faculty member regarding that instructor's absence policy shall have the right to appeal through the department Chairperson, or in the event the instructor is the Chairperson, through the appropriate Dean.
