

# MINOR IN AGING STUDIES

The Aging Studies minor is an 18-hour interdisciplinary program designed to offer students the opportunity to gain expertise on the holistic process of aging and developmentally appropriate and responsive professional practice related to health, family support, public policy, and socio-cultural issues. Our aim is two-fold: to stimulate and promote scholarship in the area of Aging Studies/Gerontology and to encourage students in a variety of academic units to broaden their studies to include professional development related to aging issues.
