

## African American History Month

Black History Month is a time to celebrate important African Americans and key events in African American History. The celebration for an entire month began in 1976. IHEC would like to continue that tradition.

For more information about African American History Month read more [here](#)

### Sign Up for a FREE Virtual Consultation with IHEC

**Update: Due to COVID-19, consultations will be virtual until further notice**

The purpose of an IHEC consultation visit is for campuses to enhance or strengthen their current programming, provide data to justify need for future programming, and to ensure compliance with state and federal regulations. IHEC staff members are available to guide colleges and universities in assessment, planning, and evaluation of campus AODV prevention efforts through technical assistance and use of assessment instruments developed for this project. Through consultation visits IHEC expects to fuel universities to make changes for the better

After the consultation has been completed, IHEC staff members will provide the campus representative with a comprehensive report that will guide campuses toward progressive AODV prevention modifications. Consultation visits typically take a day, and can be coordinated with an array of faculty members. You can also visit

**<https://www.eiu.edu/ihec/consultationvisits.php> for additional information.**

### Covid-19 Forecasts: Hospitalization

- This week, CDC received forecasts of daily, new reported COVID-19 hospital admissions over the next 4 weeks from 11 modeling groups that were included in the ensemble forecasts.
- This week's national ensemble predicts that over the next four weeks, the number of daily confirmed COVID-19 hospital admissions will likely decrease, with 5,700 to 15,000 new confirmed COVID-19 hospital admissions likely reported February 22, 2021.
- The state- and territory-level ensemble forecasts predict that over the next four weeks, the number of daily confirmed COVID-19 hospital admissions will likely decrease in 36 jurisdictions, which are indicated in the forecast plots below. Trends in numbers of future reported hospital admissions are uncertain or predicted to remain stable in the other states and territories.
