

As an international student I want to take part in the AIS leadership. I am currently majoring in digital media technology and minoring in graphic design. As a senior graphic designer I want to take part in the university's leadership programs. Also I want to contribute as much as I can before I graduate.

I am well aware of how to work with web designs and creating exciting and meaningful logos and posters for the university. I have previously worked with the university board marketing team. Currently I am working with housing and dining as a graphic designer. On the other hand I look forward to improving my leadership and communication skills.

Being a nominee of AIS leadership I will serve the best of my ability by creating and exploring intuitive designs.

I'm looking forward to availing this opportunity and to learn more.
