

Hiep nguyen

I am interested in this position because the organization is one of my hobbies. I enjoy organizing, supporting, scheduling, and researching. And more specifically, I want to contribute a part of my efforts to contribute to the school, to the international office, so that it can grow more and more and have more fun activities for international students. This position also helps me to expand my knowledge and reach out to many new friends. So I'm looking forward to working in this position.

Previously, I have served as class president, and chairperson on projects and participated in volunteer and charity activities. After going through these jobs, I am confident that I can do well in this position. I am confident that I can organize and arrange work reasonably. Contact and plan events in the right order and complete them at the assigned time. I have learned and matured thanks to the previous positions that I have held. I used to be a leader, so I know how to work in a team, arrange work for everyone, and especially communicate with everyone in the group. During my time as class president, most of my work was processing papers and announcing daily activities. The head of the committee organizes fun activities for the class, such as Christmas, Tet holiday, picnics, and extracurricular activities, and informs teachers about the next class schedule. etc. In addition, I often organize entertainment activities for families and children at the cancer hospital to help them feel better and increase their energy to live. And finally, I am a responsible person at work, so I think I can do well in this position.
