

## STATEMENT OF PURPOSE

I realized the significance of being a great leader during my four years as a public health administrator. Building strong relationships with students is one approach for achieving this, and to be completely honest, this is the reason I want to be a leader as I complete my graduate school and beyond. I find joy in supporting and advising students as they navigate their professional lives.

While I was a customer engagement officer, I observed numerous instances when management could have improved. For instance, management frequently failed to get our schedules to us in a timely manner when it came to scheduling. To ensure that the staff members are satisfied with their schedules and have time to prepare for their shifts, I would prioritize planning ahead and staying organized. I have the excellent decision-making, problem-solving, and negotiating skills necessary for completing projects successfully.

I am also an effective communicator. One of the most intriguing aspects of my abilities is the capacity to dedicate myself to ensuring quality improvement,

sustainability, and value-added services by utilizing cross-cutting strategies oriented toward overall leadership quality. I will build authentic connections with the people on my team in order to support and motivate them as they work to realize their full potentials. Also, I will create a work environment that is pleasant and efficient using empathy, cooperation, and positivism.

I am applying for these positions with the appropriate boxes marked because I have a strong sense of compassion for people and I enjoy inspiring others to take the necessary steps to be successful.

I anticipate hearing from you favorably.

Thank you.

Onuselogu Esther,  
*Graduate Research/Teaching Assistant*
