

Hi,

My name is Krishna Daravath (E12691972), and I'm currently enrolled in EIU's Spring Semester of the Master of Computer Technology program. The position of President of the EIU Association of International Students (AIS) significantly motivates me. My enthusiasm lies in cultivating a robust sense of camaraderie among international students on campus and in advancing cross-cultural communication and teamwork.

As I take on this responsibility, I pledge to make sure the AIS never wavers from its commitment to arranging events. I will put in endless effort to organize varied and interesting activities that meet the requirements and interests of our members with careful planning and coordination.

I also recognize the value of consistent participation and communication within the AIS community. My objective is to offer an area for candid discussion, helpful feedback, and cooperation by holding sessions open to all international students. These gatherings allow us to discuss issues, generate ideas, and deepen our ties to one another as a community.

Finally, I am committed to acting as an inclusive and proactive president, putting out much effort to improve the AIS experience for each and every member.
