

As someone who has learnt a lot from the Indian community in EIU, I would like to give back by leading the students to grow professionally and have a great experience during their time at EIU. I strongly believe I can add significant value in enabling the students with better knowledge of educational facilities at EIU, managing their finances, and future career prospects. My goal is to create a more collaborative community where students do not rely only on the student association but also each other, which would lead to collective growth of everyone.
