

I like to work as the president as I want to work for the people and I personally like myself happy when I server the people and I have server many organizations and I have personally feel very happy it that, it is the only happiness. My strength is working with the people and my weakness is see people struck, as I start working hard so that they can be out from the situation. I want to lead the organization to succeed for the student benefit so that students are the most who are most benefited and leading persons for the next ERA and for that we need to build the foundation hard enough so that we would have many floors to build, and I do have many idea that will help the students to grow their career and be ready for the future.
