

**STATEMENT :**

As an aspiring graphic designer and a part of the international student community, I am deeply invested in leveraging my creative abilities and management skills to contribute meaningfully to both the role of Graphic Designer and the Vice President of the International Students Association.

With a Bachelor of Arts in Graphic Design and Animation and my current pursuit of a Master of Arts in Graphic Design, I have honed my design skills and cultivated a keen eye for aesthetics. My experience as a Graphic Designer at different internships provided me with invaluable exposure to real-world design challenges, where I contributed to marketing and advertising campaigns for various clients.

In terms of management experience, my role as an Event Coordinator for college fests in my country equipped me with the organizational prowess and leadership acumen necessary to oversee multifaceted projects. I successfully managed event logistics, coordinated with sponsors and volunteers, and ensured the seamless execution of various events. Anchoring multiple college events further refined my communication skills and ability to engage and captivate audiences.

My objective is to utilize my volunteering and management skills to positively impact my university while gaining valuable experience for my future career. With strong leadership abilities, excellent communication skills, and proficiency in design software such as Adobe Illustrator and Adobe Photoshop, etc I am well-equipped to contribute to the Graphic Design team and effectively support the international student community as Vice President. I am eager to collaborate, innovate, and drive positive change within these roles, ultimately leaving a lasting impact on both my university and the student body.
