[Chasing the American Dream Series](#)

Political Science is also assisting with this program developed by the Office of Civic Engagement and Volunteerism. The September 11 Ted Talk includes Dr. Ashley speaking on 9/11 and immigration policy. The November 5 Ted Talk includes Dr. Burge speaking on gerrymandering, and Dr. Mueller speaking on registration and voting. The first 50 students to register for each Ted Talk night gets a free meal—sign up [here](#)!

They are also sponsoring I-Civics Game Nights—a great way to use simulations to engage in politics, but also a great way for our students to help teach others about politics and government. Department related RSOs are encouraged to reach out to support these programs.

The 400th Events

Watch for the 400th events as well, a series of events reflecting on and evaluating the impact of slavery in America. Dr. Kevin Anderson will be leading a panel discussion on voting rights in early October. More details will be forthcoming.
