Do you have an interest in working in the health care arena, but you really would prefer to limit your access to the patients? If your answer is yes, you should consider a career in Clinical Laboratory Science. Clinical Laboratory Scientists are the individuals that perform the analyses of blood and body fluids. Many work in hospital labs; however, employment opportunities exist in clinics, health agencies, industry, pharmaceutical labs, and forensic labs. For additional information on this profession, please visit The American Society for Clinical Laboratory Science (ASCLS) or the American Society for Clinical Pathology (ASCP) websites.

The 4-year Bachelor of Science degree includes 3 years at EIU and 1 year at an affiliated hospital. Students should apply to the affiliated hospitals of choice during the fall semester of their junior year. Admission into the Clinical Laboratory Science program at EIU does not insure admission to an affiliated hospital. Students should maintain at least a 3.00 GPA to be a competitive applicant; work experience in a clinical laboratory or actively engaging in undergraduate research at EIU also strengthens your resume and application.

EIU is currently affiliated with four accredited schools of clinical laboratory science/medical technology. Students should apply for entry into the affiliated programs no later than December 1st of the year before the clinical program begins. Programs typically begin in August and require 11 months to complete. Note that these affiliated hospitals are not currently accepting international students.
