

EIU Geology and Geography Department ...and YOU!!

Major in Geography, explore your world = Success!

Geography at EIU: Students can choose from one of two options, either Environmental/Physical Geography or Human Geography. Each option has classes in both sub-disciplines, so students obtain a broad background in Geography. Students can choose to do research projects with department faculty on topics ranging from stream studies and agricultural landscape evolution to mapping exercises. We have a 3D digitizer and two 3D printers, GPS base station and rovers, a fleet of drones and more to aid in these research investigations. EIU Geography graduates are employed as GIS Technicians, urban planners, cartographers and more.

Listen to Everett Lau's story of being an EIU Geography major!
