Subject: Public Records Request

Hello University Official,

I am making a public records request at your university. I am requesting the following things:

1. An excel spreadsheet (that is zipped) of every current student's email address of all (undergrad, grad, special, etc) students that attend your university.
2. Along with this spreadsheet, the student's name, major, and year in school.

If either one of these is possible, please let me know the price and turnaround time for this request. If your university requires a form, could you please attach that with a response, and or directions on how to make a public records request?

If your university does not release the email addresses of students, could I request that you give me the rest of the list with the student's name in place of the email address?

Thank you.

Danielle Goodman
