Department of Chemistry and Biochemistry
Research Celebration
Wednesday, November 10th, 2021, 5:30 – 7:00 pm
Room 1160/1190, Pemberton South (Honors College)

Research Areas:
- Molecular biological probes and fluorescence microscopy
- Energy storage and electrochemical catalysis
- Coordination chemistry for sensing and imaging applications
- Computational discovery of materials for catalytic reactions
- Zinc metallobiochemistry and Bacterial carbon metabolism
- Supramolecular assembly: synthesis of mechanically interlocked molecules
- Organic synthesis of basket-shaped molecular containers
- Synthesis of organic materials

Important reasons why you should stop by:
- Find out about research projects within the department!
- Great opportunity to meet Chemistry & Biochemistry students and faculty!
- Find out about your future fame and glory: publications, presentations, scholarships!
- Learn about exciting science!
